CAPITOL HILL UPDATE

Boston Capital Corporation's David Gasson will provide Forum attendees with an in-depth Capitol Hill briefing on the work going on behind the scenes with regards to federal housing legislation. Mr. Gasson will cover possible changes to the Low-Income Housing Tax Credit (LIHTC) program coming off of the industry's successful effort to secure the fixed 9 percent rate for the LIHTC. The interactive session will include an update on pending tax reform, potential changes to the private activity bond program, and what the pending presidential and congressional elections might mean for housing production.

David Gasson, Boston Capital Corporation

WEATHERIZATION – AFFORDABILITY THROUGH SUSTAINABILITY

Cutting back on energy consumption is on everybody's "to do list" because of its multiple benefits. It reduces energy costs for low income families living on shoestring budgets. It allows utility companies to meet a portion of their energy demand through efficiency. Its implementation supports and promotes better energy technology. Join this session and learn many ways weatherization contributes to the affordable housing landscape.

Steve Hastings, Foundation for Senior Living
Malissa Buzan, Gila County

DEVELOPING SUCCESSFUL PERMANENT SUPPORTIVE HOUSING USING THE LIHTC

The LIHTC program is increasingly relied upon by federal and state governments for the production of Permanent Supportive Housing even though LIHTC developments do not typically generate cash flow commensurate with costly services. Come and listen to Arizona Developers and local government officials who have succeeded in developing highly effective supportive housing through the LIHTC program.
