## Introduction

## Purpose

As a requirement to receive Community Development Block Grant (CDBG) funding, the United States Department of Housing and Urban Development (HUD), Fair Housing and Equal Opportunity Division (FHEO), requires entitlement jurisdictions to Affirmatively Further Fair Housing (AFFH) in order to carry out the full intent of federal fair housing legislation. Part of this requirement involves developing an Analysis of Impediments to Fair Housing Choice (AI) to guide the jurisdiction's Consolidated Plan and policies. The State of Arizona is a CDBG Entitlement Jurisdiction and has authorized the Arizona Department of Housing (ADOH) to complete the AI. The current AI requirements dictate that grantees:

- Complete or update their AI pursuant to HUD's Fair Housing Planning Guidebook every three to five years in coordination with the Consolidated Planning process.
- Use the results of the AI study to develop a 'Fair Housing Plan" with measurable "actions to be taken to overcome the effects of any impediments" and take those appropriate actions.
- Maintain records, including the AI study, of actions taken to implement the Fair Housing Plan.

HUD is currently in the process of developing new AI requirements to improve the "structure and process whereby HUD would provide these program participants with guidance, data, and an assessment template from which they would complete an assessment of fair housing (the AFH)."1 These requirements have not been finalized as of the start of this AI study, therefore this report will follow the AI guidelines in the Fair Housing Planning Guide from HUD. ${ }^{2}$ It can be assumed all future AI work for the state will be required to follow the new guidelines.

This AI will analyze the current state of fair housing from a variety of sources, identify new and ongoing impediments to fair housing within the state's jurisdiction, evaluate the efficacy of the 2010 Plan of Action and develop a new plan of action to address the current impediments. This AI will also support the 2015-2019 State of Arizona Consolidated Plan and should be reviewed and evaluated within the context of that plan.

[^0]
## Definition of Impediments to Fair Housing Choice

Through its policies, enforcement tools, and grantees, HUD is "committed to eliminating racial and ethnic segregation, illegal physical and other barriers to persons with disabilities and other discriminatory practices in housing."3 The Federal Fair Housing Act (FHA) protections extend beyond overt acts of housing discrimination, requiring jurisdictions that receive CDBG funds to affirmatively further fair housing (AFFH) through their neighborhood standards, planning, and enforcement of fair housing laws.

The AI process is a key step in AFFH for entitlement jurisdictions. The data analysis and research that makes up the AI is used to identify all impediments to fair housing choice within the jurisdiction. HUD defines impediments to fair housing choice as follows:

- Any actions, omissions, or decisions taken because of race, color, religion, sex, disability, familial status, or national origin that restricts housing choices or the availability of housing choice.
- Any actions, omissions, or decisions which have the effect of restricting housing choices or the availability of housing choice on the basis of race, color, religion, sex, disability, familial status, or national origin.

## Arizona's Fair Housing Goals

The state's goals in developing this AI and implementing the plan of action are consistent with HUD objectives in requiring CDBG jurisdictions to AFFH and include the following:

1. Strive to eliminate all forms of illegal housing discrimination in the state of Arizona.
2. Actively promote fair housing choice for all persons in Arizona.
3. Provide opportunities for inclusive patterns of housing occupancy regardless of race, color, religion, sex, familial status, disability, and national origin.
4. Promote integrated housing patterns and ensure equal access to opportunity for all regardless of protected class status.
5. Actively promote housing that is structurally accessible to, and usable by all persons, particularly persons with disabilities.
6. Foster compliance with the nondiscrimination provisions of the Fair Housing Act.
7. Maintain a firm and continued commitment to the analysis, planning, and implementation necessary to achieve fair housing goals.
8. Guarantee oversight by ADOH to ensure an ongoing fair housing program.
9. Create a comprehensive Analysis of Impediments to Fair Housing Choice (AI) document, and devise a carefully structured plan for addressing impediments that are firmly grounded in the AI's conclusions.
10. Take effective actions based on a realistic assessment of available resources.
11. Increase cooperation between public and private agencies in promoting public awareness of fair housing issues.
12. Educate the public on fair housing issues.
13. Effectively enforce fair housing laws.
[^1]
## Methodology

ADOH contracted the Southwest Fair Housing Council (SWFHC) to conduct this AI. SWFHC is a non-profit fair housing organization dedicated to providing comprehensive services to achieve and preserve equal access to housing for all people. SWFHC also wrote the State of Arizona's 2010 AI. ADOH reserved the right to make final edits and a number are contained herein.

SWFHC collected information and data for this AI using the following sources:

1. Reports and studies conducted and provided on a local, state, and national level.
2. Interviews with individuals informed on housing issues and who were located in either non-metro areas or with agencies whose service area was statewide. The interviews consisted of structured and openended questions.
3. A survey of approximately 266 non-metro residents of the state.
4. Newspaper articles and other publications.
5. Data from public and private agencies including HUD, the State of Arizona Attorney General's Office, Civil Rights Division (AZAG), and ADOH.
6. Discussions in the context of training sessions for housing providers by SWFHC staff.
7. Results of SWFHC enforcement investigations and complaints.

## Jurisdictional Background Data

Arizona covers 113,594 square miles, contains 15 counties, and has a population of $6,392,017$ individuals. It's unique climate, geographic, historical, and demographic characteristics shape the local culture, development, and economy throughout the state. These attributes create communities facing unique challenges but also provide opportunities for economic development. These characteristics also influence fair housing issues and it is important to understand them when developing a fair housing plan.

| Geography QuickFacts | Arizona | United States |
| :--- | :---: | :---: |
| Land area in square miles | 113,594 | $3,531,905$ |
| Persons per square mile, 2010 | 56.3 | 87.4 |

## Geography

The northern portion of the state is characterized by dry sweeping plains, river carved valleys, the Grand Canyon, and forested mountain peaks. The fringe of the Colorado Plateau lies at 4,000 feet above sea level and extends from the northern border of Arizona down to the Mogollon Rim. Along the Little Colorado River, running across the Plateau towards the Colorado River, lies the Painted Desert, where erosion has left colorful layers of sediment exposed, and the Petrified Forest National Park, one of the world's most extensive areas of petrified wood. South of the Grand Canyon, near Flagstaff Arizona, lie the San Francisco Peaks, including Humphrey's Peak, the highest point in the state at 12,655 feet. ${ }^{4}$

The southern half of the state has desert basins broken up by mountains with rocky peaks extending northwest

[^2]to southeast across central Arizona. To the south the Gila River, a major tributary of the Colorado, flows west across the entire state. This area has desert plains separated by mountain chains running north and south. In the west in the region around Yuma, the plains lose altitude and approach sea level moving towards the Colorado River delta and the Sea of Cortez in Mexico. ${ }^{5}$

5 Moon Handbooks: Arizona, Bill Weir.http://www.arizonahandbook. com/AZ_the_land.htm

Although some mountain peaks receive an annual rainfall of more than thirty inches annually, precipitation in most of the state is low. Since the early 20th century, massive irrigation projects have been built in Arizona's valleys. The Roosevelt, Horse Mesa, Mormon Flat, and Stewart Dams irrigate the Salt River Valley. The Gillespie Dam along the Gila River irrigates the Yuma area. The Coolidge Dam serves the area near Casa Grande in the Southeast. Finally, the Hoover, Glen Canyon, Davis and Parker, Imperial, and Laguna Dams along the Colorado serve California and Arizona. The Parker Dam feeds the Central Arizona Project that diverts water to Phoenix, Pinal County, and Tucson via canal. The creation of these dams and irrigation projects opened Arizona up for extensive development and economic expansion in the early 1900s through today. Despite pervasive drought conditions during the last 20 years throughout the Southwest, these projects have continued to sustain the current population and support growth and economic activity. Arizona's development patterns and economic activities have been largely shaped by the limited water supply and policies created to govern it. Water has been an essential element in all of Arizona's greatest economic drivers; agriculture, cattle production, mining, and residential development and the disparity between economies throughout the state is largely a reflection of who won and lost the battle over access to water. ${ }^{6}$

The southern edge of Arizona follows the US-Mexican border. The border stretches 389 miles and spans three counties containing 6 border crossings. The proximity of Arizona to Mexico has had a large influence on Arizona's culture, policies, and economy. The details of this dynamic will be explored from various angles throughout this document.

## Racial and Ethnic History

The original inhabitants of Arizona arrived more than 15,000 years ago. These indigenous populations were the origins of the Native American cultures and tribes known today.? The Spanish and subsequent Hispanic influence in Arizona began with the earliest European explorers to adventure

6 The Columbia Encyclopedia, Sixth Edition. Columbia University Press. 2004

7 Moon Handbooks: Arizona
into Arizona. In the 18th Century, the Spanish came back to Arizona and developed settlements and missions. These events laid the groundwork for a Hispanic culture in Arizona that was distinct from Native American culture, and, to an extent, in competition and conflict with it. ${ }^{8}$

European and American settlement increased throughout the 1800s spurred by fur hunting and mining. The War with Mexico from 1846 to 1848 ended with the Treaty of Guadalupe Hidalgo, creating a border between Mexico and America along the Gila River. In 1853 the Gadsden Purchase allowed America to purchase more Mexican territory and formed the current border with Mexico. ${ }^{9}$

Several groups began arriving in Arizona in the mid-1800's as mining, agriculture, the railway, and manufacturing expanded in Arizona. The Mormon presence in Arizona increased between the 1840s -1950s. A larger migration occurred in the 1870s into the rural present day counties of Apache and Navajo. ${ }^{10}$ Arizona continues to have communities with a strong Mormon presence. Asian migration to Arizona began when Chinese immigrants arrived in the mid-1800s as well, seeking work as miners, railway workers, agricultural laborers, fisherman, and in manufacturing plants. ${ }^{11}$

Throughout the 20th century into the present, Latin American immigration to the United States has influenced Arizona's culture and policies. Early 20th Century immigration was largely fueled by the agricultural expansion made possible through newly secured water stability. Poor working conditions and lack of legal rights available to these workers lead to generational poverty and dependency for many of these families. Cesar Chavez, a leader in improving the lives of farm workers nationally, was born in Yuma, Arizona

8 Moon Handbooks: Arizona
9 Land, Sky, and People: The Southwest Defined, "The Anglo-
American Experience," Volume 34, Number 3, Autumn 1992. http://digital.
library.arizona.edu/jsw/3403/anglo.html
10 Rhonda Tintle, "A History of Chinese Immigration into Arizona
Territory: A Frontier Culture in the American West," Graduate Dissertation, 2004
in 1927. He was the son of farm workers who worked in Arizona and California and was exposed early on to the conditions and injustice faced regularly by farm workers. In 1962, he founded the United Farm Workers, leading peaceful protests and promoting significant legal reforms. The United Farm Workers continue to be activists for Latin American, labor and immigration causes. ${ }^{12}$

The 20th Century saw significant changes for Native American tribes throughout Arizona. In 1932, the federal Indian Reorganization Act, restored tribal rights to govern themselves independently. This allows tribes to form their own governments, however also makes reservation land exempt from certain federal policies such as the FHA. More than a quarter of the state's land is reservation land and Arizona has the second largest American Indian population in the U.S. ${ }^{13}$ Despite the inapplicability of the FHA on reservation land, there are severe issues of housing disparity on reservation land and reported fair housing concerns for Native Americans living in communities near reservations. In 2013, SWFHC completed a Fair Housing and Equity Assessment of Apache and Navajo Counties which took an in-depth look at the housing issues on northern Arizona's reservation lands and nearby communities. The results of this study will be looked at more closely in the 'Assessment of Current and Private Fair Housing Activities' section.

African American history in Arizona is characterized by a unique blend of local and national events that have significantly impacted African American access to

| 12 | ufw.org |
| :--- | :--- |
| 13 | http://arizonaexperience.org/people/ |

indian-tribes-and-communities
opportunity and equal housing choice. African Americans began to move into Arizona soon after America took control of the Mexican territory. This early migration was small and many came to escape slavery. By 1900, the African American population of Phoenix had grown to $2.7 \%$ of the total population. The African American population continued to grow in Arizona, along with other populations, during and after World War II. Many African Americans came to Arizona with the armed forces. ${ }^{14}$ The black population in Arizona is about 4.2\% today, but is substantially higher in communities with manufacturing and military bases like the Phoenix metro area and Sierra Vista. ${ }^{15}$

The Territorial Legislature codified segregation by enabling school districts to segregate based on race and ethnicity. This law remained in force until 1954 when the U.S. Supreme Court declared segregation unconstitutional in the landmark case of Brown v. Board of Education of Topeka. At that time, Arizona was one of only four states outside of the South which permitted segregated schools. In reality, segregation had extended not just to schools, but to every public venue in Arizona including restaurants, theaters, hospitals, hotels, swimming pools, buses, social clubs, and housing, for almost a century.

Migration into the United States from Mexico has historically been driven by economic disparities and the need for labor in the U.S. Some of the attitudes expressed in cases of housing discrimination have been the

14 "In the Steps of Esteban: Tucson's African American Heritage," http://parentseyes.arizona.edu/ esteban/abriefhistory.html

15 http://quickfacts.census.gov/qfd/states/04000. html
result of stereotypes etched by the fear of terrorism, immigration controls, and policies that many believe are not restrictive enough.

In an Analysis of Impediments to Fair Housing Choice (AI), it is important to recognize that today's social, political, and economic realities are shaped by public policy decisions and private sector actions made over the course of Arizona's history. Arizona's segregated housing patterns are shaped by not only the individual's housing preferences, often blamed for causing "white flight" and people to "self segregate," but from decades of federal, state, and local policies that intentionally segregated people and communities. Private and public sector housing policies and practices such as redlining and blockbusting, significantly impacted the housing available to people of color. ${ }^{16}$

Though these segregationist policies were banned in the 20th Century, their impact is still seen in segregated housing patterns today. Communities segregated on racial and ethnic lines are also more likely to be areas of highly concentrated poverty. Decades of disinvestment and private sector practices perpetuate the limited access to opportunity and upward mobility. In addition, segregated neighborhoods often have environmental justice concerns because of high concentrations of pollution from industry and other locally unwanted land uses.

Today's policy decisions define tomorrow's realities. Housing policies can shape communities for decades. Fair housing law seeks to prosecute illegal housing

16 http://www.epi.org/publication/makingferguson/
discrimination and create integrated communities of opportunity. A comprehensive AI with a realistic and achievable plan of action is imperative to guide the creation of housing policy that recognizes and overcomes impediments to fair housing choice in Arizona.

## Current Events

While immigration is not directly a fair housing issue, the politics associated with immigrations have the power to influence the perception and treatment of people of different national origins. As passions are so strong on both sides of the issue, and many Hispanics feel they have been targeted, it is important to document the issue because of its potential impact on housing discrimination. For example, SWFHC's frequent interactions with landlords has revealed confusion about how SB1070 affects whether it is legal to rent to undocumented immigrants. In addition, if a landlord wants to screen out applicants who are not in the country legally, the landlord cannot have a separate application process for Hispanics because of the perception that they are more likely to be undocumented. SWFHC has also received allegations of apartment complexes treating Hispanic tenants differently than others in an effort to rid them from a property. Regardless of the intent of laws like SB1070, many Hispanics feel it targets them.

## Population

This AI focuses on the parts of the state that receive CDBG funding through the State of Arizona. The State of Arizona is itself a CDBG entitlement jurisdiction which allocates CDBG funds to communities which otherwise would not receive these funds. Therefore this report does not address the two most populous counties in Arizona, Maricopa County and Pima County, or any jurisdictions within them but may include their information as a point of comparison. It will also not include the cities of Yuma, Prescott, Sierra Vista, Douglas or Flagstaff. These independent entitlement jurisdictions may be looked at in context with the rest of the state to aid analysis. Wherever possible attempts were made to calculate county totals without these entitlement jurisdictions but this was not possible for some of the data and will be noted throughout the document.

In the tables in this document, the information is drawn from the 2013 American Community Survey (ACS) unless noted otherwise. The ACS is an ongoing survey that is conducted annually by the United States Census Bureau. The data is regularly used by government agencies to plan investment and services in communities. This is the most up to date and accurate information that is available. General population data has been organized largely by county.

One of the primary methods of data analysis used in the following section are heat maps. A heat map is a two-dimensional
representation of data in which values are represented by colors. In the following heat maps the intensity of the color corresponds to the value of the field. Hence, fields containing larger values will be filled with more intense colors. This method of data analysis is useful because it makes it possible to identify trends and groupings in large data sets at a glance.

This method was chosen due to the nature of the study area. The state of Arizona is expansive in terms of land mass and counties vary greatly in terms of demographic profile. By analyzing the data by county we are able to determine if there are discrepancies between these geographies in terms of demographics and resources. By providing a full breakdown of the various community characteristics rather than a summary point like a mean or a median, the full characteristics of the study population are able to be determined.

Arizona ranks sixth in landmass in the United States and has a population of 6,479,703, split relatively evenly between females (50.3\%) and males (49.7\%). Arizona is as large as all of New England, with the southern and northern borders covering a distance larger than the drive from Washington, DC to Boston. Demographics, cultural and economic contexts, and populations vary drastically across the state. The immense distance that must be covered to provide fair housing services is an impediment to fair housing on its own.

|  | Arizona Total | Non entitlement jurisdictions | CDBG entitlement jurisdictions |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Total population | $6,479,703$ |  | $1,342,112$ |  | $5,137,591$ |  |
| Male | $3,221,367$ | $49.7 \%$ | 678,984 | $50.6 \%$ | $2,542,383$ | $49.5 \%$ |
| Female | $3,258,336$ | $50.3 \%$ | 663,128 | $49.4 \%$ | $2,595,208$ | $50.5 \%$ |
|  |  |  |  |  |  |  |

Table 1: Arizona population totals

Population growth trends are divergent between counties. For example, in Apache, Cochise, and Gila counties, the populations have declined slightly from 2010 to 2013, whereas the populations in Coconino, Graham, and Greenlee counties are increasing in size. As a whole, population in the state has increased from 5,130,632 to 6,392,017 between the 2000 and 2010 Census, an increase of $24 \%$ in ten years. The 2013 ACS projects Arizona's population as $6,479,703$. Pinal County, which had seen an explosive $82.1 \%$ population growth rate between 2000 and 2008, slowed to $19 \%$ population growth between 2008 and 2013.

Arizona's population is highly concentrated in the metropolitan areas of Phoenix and Tucson which are not covered in this analysis. Nearly $90 \%$ of the population of the state lives in urban areas. The 10 percent of the population living in rural settings is scattered throughout the state. Many of these areas are exceptionally remote, often lacking in economic development and opportunities available in metropolitan areas. These opportunities include access to medical care, education, public transit, employment, and other factors. Additionally non-metropolitan areas often have higher housing quality problems, higher concentrations of minority populations, and lower incomes. All of these factors are important to be taken into consideration when completing an Analysis of Impediments to Fair Housing Choice.

| Year | Rural Population | Rural Percentage | Urban Population | Urban Percentage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2010 | 651,358 | $10.19 \%$ | $5,740,659$ | $89.81 \%$ | $6,392,017$ |

Table 3: Population change by county

## Demographics

## General State Information

Nearly fifty million Americans live in non-metropolitan (non-metro) areas, as currently defined. The non-metro classification covers approximately 2,000 counties outside the primary daily commuting range of urbanized areas with 50,000 or more people, and is widely used to define "rural" for research and policymaking. Non-metro areas contain 17 percent of the U.S. population but extend across 80 percent of the land area. The non-metropolitan area of Arizona is much smaller in terms of population and economic activity as compared to Maricopa County and Pima County. It has higher poverty rates, higher housing quality problems, higher concentrations of minority populations, lower job growth and lower
median household incomes. Specific demographic, economic, and housing differences between nonmetropolitan and metropolitan areas of Arizona are presented throughout this section.

The following sections will describe demographic characteristics of the state which may have fair housing implications. All data, unless otherwise noted, was taken from the U.S. Census. Fair housing enforcement, education, and outreach strategies should be developed with these characteristics in mind to ensure the most efficient use of limited resources

| Social Characteristics | Arizona | Percentages |
| :--- | :---: | :---: |
| Total households | $2,380,990$ | $100.0 \%$ |
| Family households (families) | $1,576,520$ | $66.2 \%$ |
| With own children under 18 years | 706,431 | $29.7 \%$ |
| Husband-wife family | $1,146,036$ |  |
| With own children under 18 years | 465,120 | $48.1 \%$ |
| Male householder, no wife present | 134,171 | $19.5 \%$ |
| With own children under 18 years | 71,914 | $5.6 \%$ |
| Female householder, no husband present | 296,313 | $3.0 \%$ |
| With own children under 18 years | 169,397 | $12.4 \%$ |
| Nonfamily households [7] | 804,470 | $7.1 \%$ |
| Householder living alone | 621,008 | $33.8 \%$ |
| Male | 288,621 | $26.1 \%$ |
| 65 years and over | 68,260 | $12.1 \%$ |
| Female | 332,387 | $2.9 \%$ |
| 65 years and over | 147,722 | $14.0 \%$ |
| Households with individuals under 18 years | 800,348 | $6.2 \%$ |
| Households with individuals 65 years and over | 628,997 | $33.6 \%$ |
| Average household size | 2.63 | $26.4 \%$ |
| Average family size | 3.19 |  |

[^3]
## Age

The median age in Arizona has risen very slightly since the 2010 AI, from 35.1 to 35.9. The school-age population (19 years and under) has risen from $26.3 \%$ in the 2010 AI to $28.4 \%$. The Working Age population has dropped from $60.4 \%$ to $57.8 \%$. The Retirement-Age Population ( 65 years and older) rose from $13.3 \%$ to $13.8 \%$. This population will continue to grow significantly as the first wave of "baby boomers" reach retirement age. This population shift will exert significant pressure on public resources allocated for this age group. This will have a significant impact in Arizona since the state is a popular retirement location. Persons over 65 are significantly more likely to have disabilities and to require accessible housing. In 2013, 46 percent of persons with a disability were age 65 and over, compared with 14 percent of those with no disability. ${ }^{17}$ Maps on page 38 will show areas of the state with concentrations of persons with disabilities that are under 65.

$\square$ Arizona population living in non entitlement areas
Figure 1: Age Tree Comparison US v Arizona
United States

While the majority of the population in Arizona not living in an entitlement jurisdiction trends older than both national populations and the rest of Arizona, age distribution varies greatly between counties. Apache, Graham, Greenlee, Navajo, Santa Cruz, and Yuma Counties all trend relatively young while Cochise, Gila, La Paz, Mohave, and Yavapai County trend significantly older. These counties largely overlap with the counties with high concentrations of persons with disabilities under the age of 65 , increasing the strain in resources available to persons with disabilities.

Table 5: Age distribution by county heat map

## Income and Poverty

The income data for the state shows a wide range of earning distribution across the counties. While the largely urban counties of Pima and Maricopa tend to earn higher wages, several rural counties are very similar in regards to income. Cochise, Coconino, and Pinal County all have similar household income distribution to the urban counties of Maricopa and Pima. The counties of Apache, Navajo, and Santa Cruz all contain a very high percentage of households in extreme poverty earning less than \$10,000 a year. These counties also have high concentrations of different minority groups, shown in the maps on page 37. Areas with racial and ethnic concentrations should be noted because of the obligation to affirmatively further fair housing by alleviating these concentrations. In the demographic breakdown of the categories that follow, such as education, poverty rates, home ownership, and other economic indicators, most of the areas at greatest risk are also areas of high racial and ethnic concentrations. The rural nature of many of the areas within the state's jurisdiction increases the difficulty in providing services to these communities.

|  | Median income | Population below poverty <br> level in last 12 months |
| :--- | ---: | ---: |
| Apache County | $\$ 31,476$ | $36.2 \%$ |
| Cochise County | $\$ 45,755$ | $17.1 \%$ |
| Coconino County | $\$ 49,555$ | $23.0 \%$ |
| Gila County | $\$ 39,954$ | $21.6 \%$ |
| Graham County | $\$ 44,943$ | $22.3 \%$ |
| Greenlee County | $\$ 47,992$ | $16.0 \%$ |
| La Paz County | $\$ 35,776$ | $19.4 \%$ |
| Mohave County | $\$ 39,200$ | $19.4 \%$ |
| Navajo County | $\$ 36,927$ | $30.3 \%$ |
| Pinal County | $\$ 50,027$ | $15.6 \%$ |
| Santa Cruz County | $\$ 37,745$ | $26.3 \%$ |
| Yavapai County | $\$ 42,987$ | $15.8 \%$ |
| Yuma County | $\$ 41,595$ | $20.2 \%$ |
| Maricopa County | $\$ 53,596$ | $16.7 \%$ |
| Pima County | $\$ 45,841$ | $15.6 \%$ |

* Data does not include CDBG jurisdictons located within the counties

Educational attainment is a key component in identifying areas of opportunity as defined by HUD. By analyzing the data by county it is apparent that a disproportionately large portion of the population living in Apache, La Paz, Santa Cruz, and Yuma is undereducated while Coconino, Yavapai, and Cochise County have a high rate of education. These differences most likely contribute to the differences in household incomes described on the previous page. Apache, La Paz, Santa Cruz, and Yuma are all counties where a majority of the population is either Hispanic or Native American so these low levels of education attainment
have a disproportionate effect on these minority populations when taken in context of the entire state. After charting the median income in relationship to education it appears that in most communities, an investment in education is worthwhile in terms of growing earning potential. Yavapai and Gila County are the two outliers as they show very low income growth for secondary and post graduate education. This is an especially interesting fact for Yavapai County as they have one of the higher percentages of graduate or professional degree attainment.

|  | Less than high school graduate | High school graduate or equivalent | Some college or associate's degree | Bachelor's degree | Graduate or professional degree |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Apache | \$16,099 | \$20,787 | \$28,581 | \$41,488 | \$50,162 |

## Racial Composition

| Race | United States | Arizona non-entitlements | Arizona CDBG entitlements |
| :--- | :---: | :---: | :---: |
| Total population | $311,536,594$ | $1,342,112$ | $5,137,591$ |
| White | $74.0 \%$ | $75.8 \%$ | $80.1 \%$ |
| Black or African American | $12.6 \%$ | $1.9 \%$ | $4.8 \%$ |
| American Indian and Alaska <br> Native | $0.8 \%$ | $12.8 \%$ | $2.2 \%$ |
| Asian | $4.9 \%$ | $0.9 \%$ | $3.3 \%$ |
| Native Hawaiian and Other <br> Pacific Islander | $0.2 \%$ | $0.2 \%$ | $0.2 \%$ |
| Some other race | $4.7 \%$ | $5.6 \%$ | $6.4 \%$ |
| Two or more races | $2.8 \%$ | $2.8 \%$ | $3.0 \%$ |

Table 10: Racial comparison

The racial composition of the of the non-entitlement areas of Arizona is markedly different than the United States and the rest of Arizona entitlement jurisdictions. The study area contains a much higher percentage of Native Americans while having a lower frequency of African Americans as well as Whites. In the chart below the data is broken down further by county and arranged from least diverse to most. Staff have calculated these figures without any population living in an entitlement jurisdiction and
have included Maricopa and Pima County as a point of comparison. It is interesting to note that many of the rural counties are more diverse and contain a higher percentage of minorities than the larger urban areas contained in Maricopa and Pima County. The most represented minority group is American Indians with a very strong presence in counties that contain tribal communities.

|  | Total population | White | American Indian and Alaska Native | Some other race | Black or African American | Asian | Native Hawaiian and Other Pacific Islander |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Yavapai*** | 171,965 | 93.7\% | 3.3\% | 3.1\% | 1.0\% | 1.2\% | 0.1\% |
| Mohave | 201,680 | 92.6\% | 4.1\% | 3.6\% | 1.6\% | 1.8\% | 0.4\% |
| Greenlee | 8,679 | 90.7\% | 3.2\% | 7.9\% | 1.2\% | 0.3\% | 0.0\% |
| Cochise* | 68,563 | 90.0\% | 2.9\% | 7.9\% | 2.2\% | 1.4\% | 0.5\% |
| Yuma**** | 106,534 | 84.4\% | 2.2\% | 12.8\% | 1.3\% | 0.9\% | 0.2\% |
| Maricopa | 3,889,161 | 83.1\% | 2.6\% | 6.4\% | 6.1\% | 4.5\% | 0.4\% |
| Pima | 986,891 | 82.0\% | 4.1\% | 8.8\% | 4.5\% | 3.6\% | 0.3\% |
| Gila County | 53,335 | 81.8\% | 16.0\% | 2.7\% | 1.0\% | 0.8\% | 0.0\% |
| Pinal | 379,128 | 81.2\% | 6.1\% | 7.1\% | 5.5\% | 2.4\% | 0.7\% |
| Graham | 37,168 | 78.4\% | 15.2\% | 5.1\% | 2.4\% | 0.7\% | 0.3\% |
| Santa Cruz | 47,122 | 76.4\% | 0.6\% | 23.0\% | 1.0\% | 0.8\% | 0.1\% |
| La Paz | 20,408 | 72.6\% | 14.0\% | 12.7\% | 1.1\% | 0.7\% | 0.2\% |
| Coconino** | 68,226 | 54.3\% | 43.3\% | 2.5\% | 1.0\% | 0.9\% | 0.2\% |
| Navajo | 107,326 | 52.0\% | 45.4\% | 4.1\% | 0.8\% | 1.0\% | 0.4\% |
| Apache | 71,978 | 25.5\% | 73.5\% | 1.0\% | 1.0\% | 0.5\% | 0.4\% |

[^6]
## Racial Poverty Rates

When income levels are broken down by racial categories the disparity in levels of poverty becomes very apparent. In every county Whites fare much better than minorities in terms of poverty rates. In some areas there are more than twice the percentage of African Americans and Native Americans below the poverty level than their White counterparts. Some of the minority populations in these counties such as Asian, Native Hawaiian, and African American are incredibly small and constitute a tiny fraction of an already small population. Due to this there may be a greater margin of error for some of these statistics. This notion does not hold true for the Native

American population as they are very highly represented in the community. This is especially important as the data shows that they suffer the highest frequency of poverty and disparity from the White population. When compared to the poverty levels of the urban counties it appears that they do not fare better than the rural counties in alleviating this high level of poverty.

Table 12: Percent of population below poverty rate by race and county

## Foreign Born Population

Arizona's border with Mexico greatly influences the population of the state. The Southwest region has a long history of Hispanic settlement and is greatly influenced by the Spanish culture that has been in the area for hundreds of years. Economic instability in Mexico and Central America force many to cross the border in desperate situations, seeking assistance.

In several counties there is a very large foreign born population, most notably in the border counties of Yuma and Santa Cruz where almost a third of the population was born outside of the United States. The flow of arrivals only serves to reinforce the bond between recent immigrants and the generational Hispanic population.

[^7]| County | Foreign born population |
| :--- | :---: |
| Santa Cruz | $33.50 \%$ |
| Yuma**** | $30.40 \%$ |
| Maricopa | $14.90 \%$ |
| La Paz | $13.50 \%$ |
| Pima | $12.80 \%$ |
| Pinal | $10.10 \%$ |
| Cochise* | $9.78 \%$ |
| Mohave | $6.90 \%$ |
| Yavapai*** | $6.85 \%$ |

| Pinal | $28.80 \%$ |
| La Paz | $24.20 \%$ |
| Gila County | $18.20 \%$ |
| Mohave | $15.10 \%$ |
| Yavapai* | $14.90 \%$ |
| Navajo | $10.90 \%$ |
| Coconino* | $8.64 \%$ |
| Apache | $6.00 \%$ |

* Figures do not include population in CDBG jurisdiction

Table 14: Hispanic population percentages

The Hispanic population is the most heavily represented minority in the state of Arizona. In the counties of Santa Cruz and Yuma they actually comprise a vast majority of the population. In Santa Cruz, 82.7 percent are Hispanic while in Yuma County 63.58 percent are Hispanic. The general distribution of the Hispanic population is represented on Map 4 later in this document and, as would be expected, most concentrations of Hispanics can be found in communities closer to the border.

The Hispanic population is particularly vulnerable to housing discrimination as compared to other minorities due to a potential language barrier. Even the native English speaking population is often unaware of protections offered against housing discrimination. Having a language barrier in place makes the Hispanic population more susceptible to being taken advantage of in housing transactions as well as limiting the resources they can utilize for assistance in these matters.

## Hispanic Poverty Rates

When comparing poverty throughout the state, the most notable trend is the disparity in poverty levels between the Hispanic population and Non-Hispanic population. The chart below shows what portion of the population is below the poverty level as well as what portion is in extreme poverty (population below $50 \%$ of the poverty level). In many of these areas there is nearly the same percentage, or more Hispanics in extreme poverty as there are Non-Hispanics in poverty.

|  | Hispanic or Latino Population |  | Not Hispanic or Latino |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Less than $50 \%$ | Less than $100 \%$ | Less than $50 \%$ | Less than $100 \%$ |
| Coconino* | $11.30 \%$ | $32.00 \%$ | $7.20 \%$ | $14.20 \%$ |
| Mohave | $12.40 \%$ | $30.30 \%$ | $7.50 \%$ | $17.10 \%$ |
| Navajo | $14.40 \%$ | $29.10 \%$ | $6.60 \%$ | $15.50 \%$ |
| Maricopa | $13.20 \%$ | $29.10 \%$ | $4.80 \%$ | $9.60 \%$ |
| Santa Cruz | $9.80 \%$ | $28.40 \%$ | $9.00 \%$ | $15.60 \%$ |
| Pima | $11.40 \%$ | $26.90 \%$ | $6.30 \%$ | $13.00 \%$ |
| Yavapai* | $14.30 \%$ | $26.50 \%$ | $5.90 \%$ | $13.60 \%$ |
| Apache | $16.50 \%$ | $26.40 \%$ | $6.40 \%$ | $16.40 \%$ |
| Cochise* | $12.20 \%$ | $26.30 \%$ | $5.90 \%$ | $12.50 \%$ |
| Yuma* | $9.10 \%$ | $25.70 \%$ | $5.00 \%$ | $10.40 \%$ |

| Greenlee | $\mathrm{N} / \mathrm{A}$ | $\mathrm{N} / \mathrm{A}$ | $\mathrm{N} / \mathrm{A}$ | N |
| La Paz | $\mathrm{N} / \mathrm{A}$ | $\mathrm{N} / \mathrm{A}$ | $\mathrm{N} / \mathrm{A}$ |  |

Figure 3: Figure - Hispanic poverty rates

## Disability Rates

The portion of the population living with disabilities is very high in non-entitlement areas. The exact nature of these disabilities is not provided by the ACS survey so how this impacts housing demand and the need for accessible units is not clear. A large population with disabilities increases the chances that a request for a reasonable accommodation or modification will be made. It is important that housing providers and staff are adequately prepared for these
requests. There is a higher frequency of people living with a disability in the rural areas of the state compared to the more urban counties.

Figure 4: Disability rates by county

| County | Persons with Disabilities |
| :--- | :---: |
| Cochise* $^{2}$ | $18.93 \%$ |
| Navajo | $18.80 \%$ |
| Mohave | $18.40 \%$ |
| Gila | $18.10 \%$ |
| Yavapai*** | $17.88 \%$ |
| La Paz | $17.40 \%$ |
| Apache | $15.20 \%$ |

| Maricopa | $10.00 \%$ |
| Santa Cruz | $8.90 \%$ |
| * Figures do not include population in CDBG jurisdiction |  |
| Table 16: Disability rates by county |  |

## Poverty and Disability

When comparing the poverty rates for those living with disabilities and those living without, very little disparity was found. While most counties had a higher percentage of people with disabilities in poverty the difference was not significant especially when compared to some of the racial disparities covered earlier. Many of these counties are already high poverty areas which may contribute to this parity. When analyzing the percentage of people with disabilities in high poverty situations ( $50 \%$ below the poverty line) with disabilities no significant trend was found.

|  | Poverty rates for those living <br> with disabilities | Poverty rates for population <br> living without disabilities |
| :--- | ---: | ---: |
| Apache | $36.20 \%$ | $36.20 \%$ |
| Navajo | $31.80 \%$ | $29.90 \%$ |

Table 17: Poverty rate for those living with disabilities

Figure 5: Disability poverty rates by county

## Housing Stock

## Distribution of Building Type

A large portion of the housing stock in the study area is comprised of single unit detached structures. As compared to the distribution of the rest of the country as well as the rest of the state the non-entitlement areas are relatively similar. The study area has less multi-unit structures and a much higher share of mobile homes. This fits with the rural character of the study area.

| Units in structure | AZ Non-Entitlement areas AZ CDBG Entitlement areas | United States |  |
| :--- | :--- | :--- | :--- |
| 1-Unit, Detached | $65.23 \%$ | $62.73 \%$ | $61.70 \%$ |
| 1-unit, Attached | $1.72 \%$ | $5.93 \%$ | $5.80 \%$ |
| 2 Units | $1.48 \%$ | $1.37 \%$ | $3.80 \%$ |
| 3 or 4 Units | $2.15 \%$ | $3.82 \%$ | $4.40 \%$ |
| 5 to 9 Units | $1.52 \%$ | $5.23 \%$ | $4.80 \%$ |
| 10 to 19 Units | $0.97 \%$ | $6.29 \%$ | $4.50 \%$ |
| 20 or more Units | $1.33 \%$ | $7.92 \%$ | $8.50 \%$ |
| Mobile Home | $24.54 \%$ | $6.54 \%$ | $6.50 \%$ |
| Boat, RV, Van, etc. | $1.06 \%$ | $0.18 \%$ | $0.10 \%$ |

Table 18: Housing stock by unit type

Figure 6: Distribution of building type

## Housing Age

The ACS 5 year survey estimates 655,362 housing units in non-entitlement jurisdictions in Arizona. The age of the housing stock can play a vital role in the community in terms of access to opportunity. A good mix of well-maintained housing of varying ages offers more price points so that people of varying socio economic backgrounds can enter the market. The right amount of new structures can lower maintenance costs for owners and renters as well as encourage owners of existing properties to maintain their properties to a comparable standard.

When analyzing the general numbers for the study area and comparing them to the entitlement jurisdictions, it appears that there is more new construction in the non-entitlement areas. Upon closer inspection it appears that the vast majority of this figure is due to the outlier of Pinal County which built 53.5 percent of its 160,903 units from 2000 to 2009. Other counties do not have the same development patterns.

Figure 7: Housing age comparison

|  | Total housing units | 2010 or later | 2000 to 2009 | 1990 to 1999 | 1980 to 1989 | 1970 to 1979 | 1960 to 1969 | 1950 to 1959 | 1940 to 1949 | 1939 or earlier |

| Greenlee | 4.10\% | 2.70\% | 5.40\% | 17.20\% | 39.90\% | 15.10\% | 9.40\% | 3.30\% | 2.90\% | 4,381 |

Table 20: House room count by county heat map

The distribution of the number of rooms per housing unit reveals a great deal about these communities. Counties such as Apache, Navajo, La Paz, Coconino, and Yuma have a very high ratio of one room and two room housing units. Since this figure is a count of the total number of rooms and not bedrooms these are very constrained housing units. This has the potential to limit housing choice of families with children who are protected under the Fair Housing Act.

On the opposite side of this spectrum are counties like Pinal, Yavapai, Cochise, and Graham which all trend towards more rooms in the housing units. This has the potential to effect affordability in the area as units with more rooms will generally command a higher price.

## Owner Occupied Housing Prices

Table 21: Owner occupied housing prices by county heat map
The housing prices of owner occupied units vary greatly throughout the state. Most areas are considerably cheaper than the urban counties like Maricopa and Pima. The two exceptions to this are Coconino and Yavapai County which both have higher prices than the urban counties. This information tends to suggest a housing shortage or exceptionally high demand that is pushing those prices higher.

Apache, Greenlee, La Paz, Navajo, and Yuma County all have owner occupied housing units that are priced much lower than other parts of the state.

Home Ownership Rates

Figure 8: Owner occupancy rates

The non-entitlement jurisdictions in Arizona have very high rates of home ownership. Some counties are approaching eighty percent ownership rates. These figures consistently outperform the urban counties in Arizona as well as the national average. Coconino and Greenlee are the only counties with lower ownership rates than the national average While Greenlee is the least populous county in the state so this statistic does not carry as much weight, Coconino has a population of over 136,000 residents and has one of the highest minority levels of any of the counties.

| Geography | Percent Owner Occupied |
| :--- | :---: |
| Apache | $76.50 \%$ |
| Gila | $75.80 \%$ |
| Pinal | $74.40 \%$ |
| Graham | $74.30 \%$ |
| La Paz | $74.00 \%$ |
| Navajo | $72.00 \%$ |
| Yavapai* | $70.00 \%$ |
| Yuma* | $69.60 \%$ |
| Mohave $^{\text {Cochise* }}$ | $69.40 \%$ |
| Santa Cruz | $68.80 \%$ |
| United States | $66.30 \%$ |
| Pima | $64.90 \%$ |
| Maricopa | $62.70 \%$ |
| Coconino* | $62.50 \%$ |
| Greenlee | $59.50 \%$ |

Table 22: Percent owner occupied units

## Cost Burden

Cost burden is defined as a household paying more than $30 \%$ of its income towards a housing payment. The data shows a shocking level of cost burden for both renters and owners. Seven of the thirteen counties have more than $50 \%$ of their renters experiencing cost burden. Owners appear to be experiencing less cost burden than renters with only Greenlee and Apache counties showing a higher cost burden for owners. This is significant as ownership rates are high in these counties. Even though owners may be faring better than renters in terms of housing costs, the percentage of owners experiencing cost burden is still high. Even in Greenlee, Graham, and Cochise Counties where owners experience the least cost burden, almost a third of owners pay more than $30 \%$ of their income towards their housing payment.

|  | Owners with cost burden | Renters with cost burden |
| :--- | ---: | ---: |
| Yavapai | $45.70 \%$ | $53.60 \%$ |
| Gila | $42.60 \%$ | $51.70 \%$ |
| Mohave | $41.70 \%$ | $51.00 \%$ |
| Santa Cruz | $40.80 \%$ | $50.30 \%$ |
| Yuma | $40.00 \%$ | $52.20 \%$ |
| Apache | $39.00 \%$ | $32.60 \%$ |
| Pinal | $38.30 \%$ | $50.10 \%$ |
| Navajo | $37.60 \%$ | $45.00 \%$ |
| Coconino | $36.70 \%$ | $55.20 \%$ |
| La Paz | $32.10 \%$ | $35.10 \%$ |
| Cochise | $31.50 \%$ | $45.90 \%$ |
| Graham | $31.40 \%$ | $42.30 \%$ |
| Greenlee | $29.70 \%$ | $14.90 \%$ |

Figure 9: Cost burden rates for home owners and renters

## Minority Concentration Areas

## High Minority Census Tracts

The following table contains a list of census tracts for the non-metro counties of Arizona, not including Indian Reservations, which have a minority population concentration higher than $45 \%$. The primary minority group in all of the targeted census tracts is Hispanic. If the census tract includes reservation land, the highest minority group is Native American.

## Arizona Minority Concentration Areas and Language Statistics

| County | Population | Percent Minority* | Percent Language Other Than English | Speak English Less Than "Very Well" | Percent of Census <br> Tracts with Minority Concentrations** |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Apache | 71518 | 79.6\% | 57.0\% | 11.8\% | 75.0\% |
| Cochise | 131346 | 41.5\% | 27.4\% | 9.3\% | 37.5\% |
| Coconino | 134421 | 44.8\% | 23.5\% | 8.1\% | 42.9\% |
| Gila | 53597 | 34.1\% | 14.4\% | 3.4\% | 31.3\% |
| Graham | 37220 | 47.7\% | 20.1\% | 6.6\% | 44.4\% |
| Greenlee | 8437 | 51.9\% | 24.3\% | 5.5\% | 66.7\% |
| La Paz | 20489 | 37.3\% | 18.8\% | 9.6\% | 33.3\% |
| Maricopa | 3817117 | 41.3\% | 26.3\% | 10.0\% | 41.2\% |
| Mohave | 200186 | 20.4\% | 10.9\% | 4.2\% | 9.3\% |
| Navajo | 107449 | 56.1\% | 36.8\% | 9.6\% | 58.1\% |
| Pima | 980263 | 44.7\% | 28.5\% | 8.4\% | 41.1\% |
| Pinal | 375770 | 41.3\% | 21.9\% | 6.2\% | 52.0\% |
| Santa Cruz | 47420 | 84.0\% | 76.9\% | 31.8\% | 90.0\% |
| Yavapai | 211033 | 18.0\% | 10.4\% | 3.7\% | 2.4\% |
| Yuma | 195751 | 64.7\% | 51.2\% | 22.3\% | 74.5\% |
| State | 5985233 | 45.0\% | 28.7\% | 10.2\% | 46.6\% |

Source: 2010 US Census Profile of General Population and Housing Characteristics

* Total percent of population not designated as "White Alone"
** Concentration defined as greater than or equal to $10 \%$ above the county average
Counties with minority population that exceeds the concentration threshold.
Table 24: High minority census tracts

The data presented in the table also reveals that there is a strong relationship between minority population concentration, poverty rate, and income. For example, the majority of the selected census tracts with high concentration of minority populations also had higher poverty rates. Median family incomes in these census tracts were at low and moderate levels. The average number of people living below poverty in these census tracts is $18.7 \%$, higher than the state average.

## Minority Concentration Area Maps

All maps appearing in this document were developed by SWFHC with information taken from the US Census unless otherwise noted with the exception of the foreclosure maps on pages 39 and 40 which were made by The Federal Reserve Bank of San Francisco. The visual representation of the data provided by the maps allows information to be easily interpreted in the context of its geographic location and surrounding influences.

The high minority census tracts in Table 23 above are mapped in Maps 1-4 below. The visual representation of this information shows how race and ethnicity changes across the state. Map 1 shows that there are high minority census tracts spread throughout the state. By looking at different racial and ethnic groups individually, trends begin to emerge that could influence fair housing programs. Map 4 shows
the high Hispanic census tracts in the state. All southern counties in the state have very high Hispanic populations. Fair housing enforcement activities and bilingual education which focuses on national origin discrimination and the housing rights of immigrants would be especially useful in these areas. The high Native American census tracts, seen in Map 2, are near Indian reservations throughout the state, but particularly in northern Arizona. Though the FHA does not apply to reservation lands, fair housing enforcement and outreach activities near reservation lands should be designed with these factors in mind. The high African American Census tract map, Map 3 shows that African American concentrations are tied to urban areas and job centers, such as military bases, throughout the state, and are not as regionally concentrated as Hispanic and Native American populations.

## Hispanic Concentration Areas in Arizona

Source: 2010 US Census; Protected Areas Database of the US; Esri

* Concentration defined as greater than or equal to $10 \%$ above the state average
by Geoff Davies
Map 1 shows the concentrations of Hispanic populations around the state. All areas with the highest concentrations are located in southern areas of the state, near the U.S.-Mexico border. In these regions, Spanish-English bilingual fair housing education and outreach strategies are important to ensure the entire population knows their fair housing rights.

## Native American Concentration Areas in Arizona

2010 US Census; Protected Areas Database of the US; Esri

* Concentration defined as greater than or equal to $10 \%$ above the state average
by Geoff Davies
Map 2 shows the areas where there are high concentrations of Native Americans. These regions are generally located on or near reservation lands. Though fair housing laws do not apply to reservation lands and these areas are not within the states jurisdiction, the areas on and near reservation are at a higher risk of lacking economic opportunities and housing resources. Additionally, while SWFHC was conducting the 2013 Fair Housing and Equity Assessment for northeastern Arizona, discussed further on page 47, several individuals stated concern for housing discrimination against Native Americans in communities adjacent to reservation land, such as Show low and Winslow. Fair housing enforcement, education, and outreach in these areas should be targeted towards the needs of Native Americans, including the possible need for an interpreter.

## African American Concentration Areas in Arizona

Source: 2010 US Census; Protected Areas Database of the US; Esri

* Concentration defined as greater than or equal to $10 \%$ above the state average
by Geoff Davies

African American concentration areas, shown in Map 3, are scattered throughout the State's jurisdiction area including Navajo, Pinal, Graham, Cochise, and Yuma counties. Many of these areas are located near industrial and agricultural job centers and military bases, and may reflect areas where fair housing enforcement and education on race is required.

## Minority Concentration Areas in Arizona

Source: 2010 US Census; Protected Areas Database of the US; Esri

* Concentration defined as greater than or equal to $10 \%$ above the state average
by Geoff Davies

Map 4 shows the areas of the state with minority concentration areas at or above $10 \%$ of the state average. Map 4 shows significant minority concentration areas within most counties under the State's jurisdiction. When these areas are broken down, regional trends appear that should influence the type of enforcement activities and education and outreach initiatives promoted by the State.

## Arizona Population Less Than 65 Years Old with a Disability

Source: 2013 ACS 5 Year Estimates; Protected Areas Database of the US; Esri Map by Geoff Davies

Map 5 shows the distribution of persons under 65 years old with a disability. Persons with disabilities are protected by federal and state fair housing laws. Fair housing laws pertaining to disability not only protect individuals from denial of housing due to their protected class status, but also require housing providers to allow for modifications and accommodations that give the person with a disability the ability to fully use and enjoy their home, such as a ramp, shower grab bars, or a service animal. If a housing provider receives federal funding, there is a financial obligation to pay for many of these modifications as well.

Map 5: Arizona Population Less Than 65 Years Old with a Disability

## Arizona Population Less Than 65 Years Old with a Disability Compared to Minority Concentration Areas

Map 6 shows the areas of the state with concentrations of persons with disabilities as well as minority concentration areas. The eastern region of the state, in Pinal, Cochise, Graham, and Navajo counties, as well as eastern La Paz county, have significant potions of land containing concentrations of persons with disabilities as well as minority populations. These regions areas may be at particular risk for lacking disability services and accessible housing. Northern Arizona, particularly on or near reservation lands, has the greatest land area of concentrations of all persons under 65 with disabilities. This region of the state also tends to be more mountainous, making it more difficult to provide accessible slopes for sidewalks in multi-housing entryways and in paths through communities. Communities with high concentrations of persons with disabilities may require education and outreach programs that target issues facing individuals with disabilities and information to housing providers focusing on what is required of them.

# Foreclosure Crisis and 

## Aftermath

A significant body of research analyzing national, state, and metropolitan area data that shows that minority households were negatively impacted by the foreclosure crisis. It is estimated that nearly 8\% of both African Americans and Latinos lost their homes to foreclosure, compared to $4.5 \%$ of whites in $2010 .{ }^{18}$ The impact this has had on the financial stability of African American and Hispanic families and minority communities is significant; "As the foreclosure crisis threatens the financial stability and mobility of families across the country, it will be particularly devastating to African-American and Latino families, who already lag their white counterparts in terms of income, wealth and educational attainment." ${ }^{19}$ Additionally, communities of color are disproportionately affected by the indirect
depreciation of value all properties suffer in neighborhoods with high rates of foreclosures. It is estimated that $\$ 194$ and $\$ 177$ billion, respectively, will have been drained from African-American and Latino communities in these indirect "spillover" losses alone. ${ }^{20}$

In Arizona, the number of delinquent mortgages and foreclosure starts has been steadily declining since 2010; however, they are still higher than they were before the housing bubble.

[^8]Figure 10: Arizona mortgage delinquency

Many of these foreclosures occurred outside of Arizona's large metropolitan regions, Phoenix, Tucson, and other CDBG entitlement jurisdictions. The map below shows the area of the state which were affected by concentrated foreclosures.

## Arizona Data Maps

## Areas Affected by Concentrated Foreclosures May 2014

Source: Lender Processing Services Inc. Applied Analytics \& FRBSF Calculations
Map 7: Areas affected by concentrated foreclosures

Despite the decline in delinquent mortgages and foreclosures, many of the areas that remain at highest risk for additional foreclosures are located outside of Phoenix and Tucson that are the subject to this report.

## Arizona Data Maps

## Areas At Risk Of Additional Foreclosures May 2014

Source: Lender Processing Services Inc. Applied Analytics \& FRBSF Calculations
Map 8: Areas at risk of additional foreclosure

Though the Arizona housing market has been recovering, vulnerable populations, including federally protected classes, are at risk of being left out. New home construction and home prices have increased since 2012. However, home prices in Arizona remain thirty percent below April 2006
levels when the national market peaked. ${ }^{21}$ Interest rates also remain at near record lows. Though these are indicators of a housing recovery, the rising demand for housing has created a tight market in many areas making it hard for

21 http://www.newyorkfed.org/outreach-and-education/
community-credit-profiles/\#map/dist_sales
many first time homebuyers to become homeowners. Also, many previous homeowners with a past foreclosure are still unable to purchase a home. Much of the housing market recovery in Arizona has been driven by private investors and investment groups that purchased a large number of the low cost, recently foreclosed homes immediately following the crisis. These buyers have not only contributed to reduced inventory and rising home values, they have also impacted the rental market. Average rents have risen to rates higher than prior to the housing crash, and rental vacancies have dropped since 2010. The tightening rental market allows landlords to be more selective of tenants, which may lead to more illegal discrimination. Many homeowners who faced foreclosure were forced to become renters. These combined factors will likely continue to have a significant impact on vulnerable populations statewide, including protected classes under the Fair Housing Act that were shown to have been disproportionately affected by the foreclosure crisis. ${ }^{22}$

During the foreclosure crisis, an unprecedented number of homes became real estate owned (REO) properties. Banks had difficulty maintaining the large volume of repossessed homes. Research conducted by the National Fair Housing Alliance (NFHA) and member organizations found that REO properties in minority neighborhoods managed by institutions like US Bank, Wells Fargo, and loan service organization Safeguard Properties were more likely to need significant repairs, have trash in the yard, have broken windows and other significant visual and structural issues. ${ }^{23}$ NFHA filed a fair housing complaint based on this research. Additionally, minority neighborhoods where property values often dropped most precipitously, were commonly sought after by investors and out of state investors in particular. As investor activity drives up local housing prices, residents of these communities may be at risk of being priced out. ${ }^{24}$ These properties are also at higher risk of being poorly maintained by landlords who are disconnected from the

22 http://billmoyers.com/2014/09/05/ferguson-the-foreclosure-crisis-
and-americas-hedge-fund-landlords
23 http://nationalfairhousing.org/REO/tabid/4265/Default.aspx
24 http://www.newrepublic.com/article/112395/wall-street-hedge-
funds-buy-rental-properties
property or disappointed in the return they are getting on their investment. ${ }^{25}$

This systematic discrimination in the housing market leading up to and during the foreclosure crisis has contributed to the incredible loss of minority wealth and neighborhood instability. At a time when homes were universally losing value, those located in minority neighborhoods declined the farthest and have recovered the slowest. This impacts the neighborhood stability and wealth of not only foreclosure victims, but also those who remain homeowners in these neighborhoods.

In response to the damage wrought by the foreclosure crisis, Arizona has aggressively sought to hold large lending institutions accountable. The state has received funds through various settlements with banks and other institutions for their role in the foreclosure crisis. The National Mortgage Settlement, decided on February 9, 2012, was a joint state-federal settlement between Arizona, 48 other states, the federal government, and the country's five largest residential mortgage loan servicers: Ally/GMAC, Bank of America, Citibank, JPMorgan Chase, and Wells Fargo. ${ }^{26}$ The settlement is one of the largest civil settlements ever reached by the attorneys general, totaling over $\$ 1.3$ billion. On June 18, 2014 the AZAG also reached a $\$ 550$ million in joint state-federal settlement with mortgage lender and servicer SunTrust Mortgage Inc. to address mortgage origination, servicing, and foreclosure abuses. The state has used these funds to mitigate the impact of the foreclosure crisis by directly preventing foreclosures, provide relocation funds and rent assistance, job training and employment services, and funding accessibility improvements for veterans. The AZAG has also been involved in several lawsuits against fraudulent mortgage rescue companies. ${ }^{27}$

Significant funds from these settlements were intended for programs to help those impacted by the foreclosure crisis, including minorities and persons with disabilities. For example, the AZAG developed a program to assist disabled veterans with

25 http://billmoyers.com/2014/09/05/ferguson-the-foreclosure-crisis-and-americas-hedge-fund-landlords

26 https://www.azag.gov/foreclosure/mortgage-settlements 27 https://www.azag.gov/press-release/attorney-general-horne-files-lawsuit-joint-federal-state-mortgage-rescue-fraud-sweep
service related disabilities to make accessibility and related improvements to their homes. ${ }^{28}$ Catholic Charities Community Services was also awarded a $\$ 2.5$ million Relocation Assistant Grant by the AZAG to assist individuals and families who are homeless or at imminent risk of homelessness due to foreclosure and who have an annual household income less than 80 percent of the county median income and the ability to pay at least a third of their income as rent and utilities. ${ }^{29}$ These programs should continue and should be programmed in a way that affirmatively furthers fair housing.

## Fair Housing Legal Status

## History of Fair Housing Legislation

The Fair Housing Act of 1968 made it illegal to discriminate in the area of housing because of a person's race, color, religion, or national origin. Gender was added as a protected class in the 1974. In 1988, the Fair Housing Amendments Act (FHAA) added familial status and disability (referred to as Handicapped in the FHAA), creating seven "protected classes." The familial status provision protects households with children under 18 years of age. Disability covers physical and mental disabilities, as well as individuals who are perceived as having a disability. Disability also includes persons with HIV/AIDS or recovering from substance abuse. Federal protection under the FHA does not cover discrimination based on age, income, source of income, or sexual orientation. Some of these classes are protected by local laws, such as sexual orientation in the cities of Phoenix and Tucson, however no such local protections exist in the jurisdictions covered by this analysis.

## Fair Housing Legislation and Policies

## Arizona Fair Housing Law

The Arizona Fair Housing ACT (AFHA) of 1991 (ARS § 41.1491) provides the same substantive protections as the FHA; however, it provides different procedures for the administrative complaint filing process. The ACT also amended the Arizona Landlord and Tenant Act to bring it into compliance with the AFHA.

Since the AFHA is essentially the same as the FHA, the state's law has been federally designated as "substantially equivalent." As a result, under the Federal Fair Housing Assistance Program (FHAP), HUD contracts with the Arizona

Attorney General's Civil Rights Division to investigate and rule on fair housing cases on its behalf. Virtually all complaints that are submitted by HUD and originate within Arizona, except for Phoenix which contains its own FHAP contract, are processed by the AG's office. Either FHAP can also receive and process complaints independent of HUD.

The State's Community Development Block Grant (CDBG) jurisdiction covers the entire state of Arizona less the 7 independent CDBG entitlement jurisdictions. These independent jurisdictions have the responsibility for developing their own AI's and conducting planning and reporting separate from the state. Every effort has been made to include information relevant only to the state's jurisdiction in this AI, but in some cases it is not possible since information is often limited in rural areas of the state. The action plan in this AI, however, is applicable only to the state's jurisdiction.

## Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Protection

Though currently the FHA does not include sexual orientation as a protected class, in recent years HUD has issued several statements affirming that LGBTQ individuals still have protections under the FHA. For example, if a transgendered individual is denied rental housing "because of the prospective tenant's non-conformity with gender stereotypes, it may constitute illegal discrimination on the basis of sex under the Fair Housing Act. ${ }^{\text {.30 }}$ Additionally, as of January 2011 HUD initiated a rulemaking "in an effort to ensure that HUD's rental housing and homeownership programs remain open to all eligible persons regardless

30 http://portal.hud.gov/hudportal/HUD?src=/program_offices/ fair_housing_equal_opp/LGBT_Housing_Discrimination
of sexual orientation, gender identity, or marital status."31 This rule protects individuals who are participating in HUD funded rental housing programs and in acquiring any HUD insured (FHA) loans.

In October 2014, circuit courts determined that a ban on same-sex marriage was unconstitutional, effectively allowing same sex couples to legally marry. Arizona is the 31st state in the country to do so. ${ }^{32}$ This legal change will most likely continue raising LGBTQ fair housing concerns, as now married couples seek rental housing, home loans, insurance, and engage in other housing transactions.

## Proposed Rulemaking on Affirmatively Furthering Fair Housing

Jurisdictions that receive CDBG funds such as the state are currently required to complete an Analysis of Impediments to Fair Housing Choice (AI) and affirmatively further the purposes of the FHA. In July 2013, concerns over the implementation of AI recommendations and the true use of CDBG funds to further the FHA led to HUD to propose an improved structure and process for meeting this obligation. HUD intends to provide program participants with "guidance, data, and an assessment template from which they would complete an assessment of fair housing (the AFH). ${ }^{\text {"33 }}$ The AFH would replace the current AI format. Since HUD's proposed rulemaking is still under review, it does not apply to this current document, but will presumably apply to future fair housing assessments by the state.

33
http://www.huduser.org/portal/affht_pt.html

## Colonias

Colonias are defined by HUD as rural communities located within 150 miles of the U.S./Mexico border that lack sewer, water, or decent housing or a combination of all three. Arizona has dozens of USDA designated colonias. ${ }^{34}$ Colonias started to develop in the 1950s and are generally unincorporated and lack many basic necessities and infrastructure. The average income of people living in colonias is 5,000 dollars per year. Eighty-five percent of colonias residents are U.S. citizens and ninety-seven percent are Hispanic.

Significant improvements have been made to the way Arizona administers CDBG set-aside funds to colonias. After an audit by HUD's Office of the Inspector General in 2008, Arizona started a colonias survey to better define the colonias' boundaries and measure their needs. In 2014, Arizona set aside the maximum allowable of 10 percent of its CDBG funds for colonias, which totaled \$914,695. HUD is currently proposing a change to its 2016 CDBG budgetary guidelines, allowing jurisdictions to designate up to 15 percent of their CDBG funds towards community development and affordable housing. ${ }^{35}$

[^9]
# Assessment of Current and Private Fair Housing Activities 

## Fair Housing and Equity Assessment

In 2012, Economic Development for Apache County was awarded a Sustainable Communities grant from HUD. SWFHC was contracted to write the Fair Housing and Equity Assessment component of their regional Northeast Arizona Plan for Community and Economic Development. Participating entities included tribal and non-tribal jurisdictions. The nontribal jurisdictions included Apache County (the fiscal agent), the town of Springerville, the city of St. Johns, and the city of Winslow. The tribal jurisdictions included the Fort Apache Indian Reservation of the White Mountain Apache Tribe, the villages of Upper Moenkopi and Sipaulovi on the Hopi reservation, and the Ganado Chapter, Fort Defiance Chapter, Chinle Chapter, and Many Farms Chapter on the Navajo Nation. This study uncovered several significant factors regarding the status of fair housing choice and equity in the region.

The fair housing environment in the nontribal jurisdictions is better than it once was due to the investment of resources by the Arizona Department of Housing (ADOH) and its partnership with the Southwest Fair Housing Council (SWFHC). The Arizona Attorney General (AZAG) has also contributed to improving fair housing in the area. Education and outreach efforts by SWFHC
are ongoing and have improved awareness and understanding of fair housing rights and responsibilities. Local governments and nonprofits could do more by having fair housing information on their websites and by training staff to be able to respond to questions, issues, and violations that occur. Jurisdictions could also pass local fair housing laws and proclaim April as Fair Housing Month. Fair housing enforcement improves with education and outreach because residents understand their rights and how to exercise them. Enforcement efforts could also be improved by focusing testing efforts in the area.

The FHA does not apply on Indian reservations but SWFHC still analyzed tribal access to opportunity. The tribal communities covered in the FHEA are some of the poorest, most underdeveloped, and low-opportunity areas in the United States. The history of oppression and mistreatment of American Indians by the United States government and society at-large is well known and has had an enormous impact on opportunity on reservations. The Navajo Nation does not have a functional private real estate market because of issues unique to reservations, including the many homes which still lack running water and electricity. The Hopi community of Sipaulovi has a few hundred residents and is situated on a mesa in the middle of the desert. People that choose
to live there are not likely there because of "opportunity" as defined by a typical FHEA. Furthermore, the ongoing conversation among tribes about how to preserve "traditional" ways of life while providing "modern" infrastructure and opportunities that the rest of the country takes for granted provide an added layer to defining the meaning of "opportunity."

## Survey Results

SWFHC created a survey to engage community members, real estate professionals, and agency staff in a conversation about fair housing, resources they feel are lacking, and their perception of challenges facing the housing industry. Across the state, 210 people completed the survey, which can be found in appendix $E$. The survey was distributed online, at public events, and at fair housing workshops.

A large percentage of people who took the survey felt as though they had been in contact with some form of housing discrimination. Over $69 \%$ of people surveyed believe housing discrimination either definitely occurs or likely occurs in their location. Just over $30 \%$ of people surveyed felt they or someone they know had either been the victim of housing discrimination or may have been the victim of housing discrimination. Just over 52\%
of people surveyed indicated that they had experienced a form of steering.

The survey results indicate that despite the prevalence of discrimination either experienced or witnessed, more than 78\% of survey respondents indicated they were either very familiar or somewhat familiar with fair housing and just over $58 \%$ of respondents said they would report discrimination of they saw it. A relatively high proportion of respondents, nearly $13 \%$, indicated that if they witnessed housing discrimination they would likely do nothing or would not know what to do, supporting the need for ongoing education and outreach.

## Interviews

Phone interviews have been conducted to gauge local and regional perspectives regarding the state of fair housing, affordable housing, and community development across the state. The individuals interviewed comprised a wide range of knowledgeable stakeholders including the private housing industry, community organizers, government departments charged with housing and community development, and nonprofit agencies. The interviews provide another perspective and balance to the community survey that focused on housing consumers. Before beginning the interview, interviewees received an explanation of the purpose of the interview, and that the interviewees name and organization would remain anonymous. The questions were similar for all interviewees and were open-ended to encourage discussion.

Throughout the course of the interviews, several common threads emerged and the interviewees brought up similar issues. They agreed on a number of similar points including the following:

- Most interviewees stated that the organizations that they work for receive very few, if any fair housing related inquiries.
- All interviewees believed that housing discrimination occurs in the community.
- While almost all interviewees worked for organizations that included or required some sort of regular fair housing training, all interviewees stated that there was a need for greater education regarding fair housing
- Families with children, Race, and LGBT status were mentioned as the most commonly discriminated populations.
- Transportation, good schools, and lack of accessible units were mentioned as the biggest issues facing these populations.
- Several felt that resources were being distributed well but that there were simply not enough to address community issues.
- Screening criteria such as the crime free addendum has a disparate impact on minorities and greatly impairs their ability to find suitable housing.

Several interviewees who worked primarily with housing felt that landlords are taking advantage of people who are unaware of the law. Everyone expressed a lack of fair housing knowledge on both the consumer and provider side as a major obstacle to fair housing in the state.

While several interviewees stated that they felt resources were being distributed evenly, others who were interviewed expressed concern about how investment was being prioritized. Some mentioned that developments like large apartment communities in more populous areas receive priority over smaller investments in rural areas that would have a proportional impact on those communities. They felt that this focus was due to a desire to have a higher profile impact and it has the effect of marginalizing rural communities and making it difficult to address the needs of these minority communities that often have higher poverty rates.

One individual mentioned that the methodology used by HUD to collect data and calculate allocation is flawed.

The interviewee stated that their community often does very in depth and detailed primary data gathering that shows a very large discrepancy between HUD's numbers and their own. The interviewee was specifically referring to a calculation of poverty levels in his community which were grossly underrepresented by HUD's figures. Due to the strict nature of HUD's program requirements these discrepancies will often disqualify them from funding. Because of this, they dedicate staff time to conducting community studies to ensure that they receive all of the funding they are eligible for. The interviewee expressed that this was staff time better dedicated towards building their community and ensuring that their HUD funded programs were successful.

## Referrals (Tests)

Southwest Fair Housing Council conducted phone tests across Arizona to determine how efficiently organizations and agency staff were able to identify a fair housing concerns and make an appropriate referral. Out of fifty attempted phone calls, forty seven were completed. The testers were given a call list and a prompt formulated by the test coordinator. They were told to be unwilling to give out specific information regarding locations and contact information but to describe that they felt they had experienced discrimination in a housing capacity based off their race or the families' child status, and were seeking a reference on who could help with their individual situations.

Overall, people had a greater knowledge of housing discrimination and where to send the tester when it came to race-based discrimination and considerably less knowledge about familial status discrimination, with $76 \%$ of respondents unable to identify familial status discrimination and $63 \%$ unable to recognize national origin discrimination. Out of forty seven completed tests, only $29 \%$ were able to identify Southwest Fair Housing Council or another appropriate resource for housing discrimination. This indicates continued fair housing education and outreach is needed throughout Arizona.

## Enforcement: Fair Housing

 Complaints and Testing
## HUD TEAPOTS (Title VIII Automated Paperless Office Tracking System) Data

HUD works with the Arizona Attorney General's Office through their Fair Housing Assistance Program (FHAP) to process complaints alleging violations of FHA within the state of Arizona. The FHAP program also requires the AG to report the complaints they receive to HUD. These are both compiled within a HUD database referred to as "TEAPOTS." HUD provided SWFHC with the following information from TEAPOTS for Arizona.

HUD's records show 1,107 fair housing complaints were processed from 2010-2014 in Arizona. Of those complaints, 131 , or nearly $12 \%$, resulted in a conciliation or settlement for the complainant. Eighty eight of the 131 successfully conciliated or settled complaints were filed on the basis of disability discrimination, with disability complaints making up nearly $60 \%$ of all complaints processed through HUD for Arizona. The amount of complaints filed for each protected class is provided in Table 25 below. The total number of complaints referencing a specific protected class is higher than the total number of complaints filed because several complaints cite more than one protected class for the basis of the act of discrimination.

| Basis of complaint | Number of complaints |
| :--- | ---: |
| Disability | 657 |
| Race | 266 |
| National Origin | 148 |
| Familial Status | 68 |
| Sex | 80 |
| Religion | 26 |
| Color | 6 |
| Retaliation | 130 |

Table 25: TEAPOT basis of complaints

## Arizona Attorney General

The Arizona Attorney General (AZAG) is the sole FHAP (Fair Housing Action Program) active in most parts of the State of Arizona. Residents of the city of Phoenix can file fair housing complaints through the city if they occurred within the city's boundaries. Fair housing complaints can also be filed directly with HUD, though it is HUD's recommendation to refer complaints and questions directly to the local FHAP or FHIP (Fair Housing Investigation Program) for assistance. The AZAG investigates individual claims of housing discrimination, attempts conciliation or mediation of complaints, and acts as the legal authority which pursues litigation if a case results in a cause finding.

Since 2010, the AZAG has investigated 985 complaints across the State. Out of all complaints filed, $59 \%$ involved a claim of disability discrimination. The next highest categories, at $20 \%$ and $13 \%$ respectively, are race and national origin complaints. The prevalence of disability, national origin, and race complaints investigated by the AZAG mirrors enforcement data found in other enforcement activities which will be discussed further below. The breakdown of all complaint types can be found in table 26 below:

| Disability | Race | Religion | National <br> Origin | Familial <br> Status | Sex | Color | Retaliation or <br> Harassment |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 583 | 201 | 26 | 125 | 70 | 52 | 4 | 124 |

Table 26: AZAG complaint basis

Out of all 985 complaints, the AZAG found no cause for $66 \%$ of all complaints. Nine percent of complaints were successfully conciliated or settled, and only 7 cases were litigated through a cause finding investigation. The low number of complaints that result in a cause finding may indicate a low number of meritorious complaints, however it may also indicate a need for increased assistance by FHIPs, such as SWFHC. As fair housing advocates, FHIPs are able to help complainants navigate the complaint filing process, communicate effectively with landlords and other housing professionals, and communicate the nature of their complaint with investigators.

## Southwest Fair Housing Council

Southwest Fair Housing Council (SWFHC) conducts hundreds of tests and processes hundreds of fair housing inquiries annually. The presence of a fair housing organization like SWFHC statewide, which conducts ongoing testing and processes fair housing inquiries daily, is an asset to the state. SWFHC's records provide a baseline of knowledge that, when combined with other data, show fair housing trends and areas of concern.

Fair housing testing is a controlled method of comparing the quality of information and services provided to a matched pair of testers. One tester is used as a control and the other tester represents one of the protected classes, race, color, national origin, sex, religion, disability, or familial status. The testers are matched in every other socio-economic category, so that it can be determined whether differences in treatment were due solely to the protected class difference. Most of SWFHC's tests are done by a matched pair of testers, though it is possible to conduct tests with a single tester, or more testers, depending on the nature and needs of the test. Testers are provided specific assignments for each test and fill out detailed analysis sheets upon
completion. Tests can be used to investigate and support a fair housing complaint or they can be done systemically. Fair housing organizations like SWFHC can bring fair housing complaints based on testing results alone. Test results are categorized as either "supports allegations" when a fair housing violation is found, "inconclusive" when it cannot be determined if differences in treatment were due to a fair housing violation, and "does not support allegations" when the test did not uncover any fair housing violations. The percentage of tests which were found to support allegations are provided below.

|  | Disability | Race | National Origin | Familial Status |
| :--- | :---: | :---: | :---: | :---: |
| \% Support Alegations | $11.43 \%$ | $9.5 \%$ | $14.4 \%$ | $13.3 \%$ |
|  |  |  | Table 27: SWFHC fair housing testing |  |

National origin tests indicated the highest test type which resulted in discrimination. Attention should be paid to this protected class when developing fair housing programs for the state. Disability tests also represented a high percentage of tests which indicated housing discrimination had occurred, which is consistent with national trends. Disability complaints make up the largest percentage of complaints processed by HUD. Though housing professionals generally understand it is illegal to discriminate against someone for their race or national origin, disability regulations are more nuanced and are often misunderstood resulting in more complaints.

SWFHC is also a referral agency that provides fair housing and other housing referrals to housing providers and the public free of charge. Out of all 2,802 inquiries, 1,932 were Landlord and Tenant Act questions or another type of housing related question. The percentage of inquiries that pertained to either one of the protected classes or a different type of housing concern is provided in Table 28.

| Protected Class | Percentage of inquiries |
| :--- | ---: |
| Other | $68.95 \%$ |
| Disability | $13.74 \%$ |
| National Origin | $8.92 \%$ |
| Race | $3.68 \%$ |
| Familial Status | $2.71 \%$ |
| Sex | $1.03 \%$ |
| Religion | $0.46 \%$ |
| Age | $0.29 \%$ |

Table 28: SWFHC referral by protected class

If the inquiry is fair housing based, SWFHC first counsels the complainant or housing professional in how to resolve their issue according to the Fair Housing Act. This is especially common when resolving disputes concerning reasonable accommodations and modifications for persons with disabilities in a rental setting. If the inquiry is either a Landlord and Tenant Act dispute or any other type of housing question, SWFHC refers individuals to various agencies and nonprofit legal assistance. Between 2010 and 2014, SWFHC received 1,932 calls that were not considered a fair housing related inquiry and were referred to an outside agency. For all calls which were determined to have a fair housing component, 870 inquiries, the results are provided in Table 28. Only categories for which SWFHC received enough calls to have a significant data set are provided.

Table 29: Loan applications by race

The National Community Reinvestment Coalition (NCRC) conducted a portfolio and market share analysis using 2013 Home Mortgage Disclosure Act (HMDA) data with the following specifications for the state of Arizona: all single family lending, loans to owner-occupants, and first lien loans. All single-family loans include loans for home purchase and refinances.

For the share analysis, NCRC evaluated the market-rate and high-cost lending trends by race of borrower (White, African-American, White non-Hispanic, Hispanic, or Asian); income level of borrower (low- and moderate-income and middle- and upper-income); income level of census tract (low- and moderate-income neighborhoods and middleand upper-income neighborhoods) ${ }^{36}$; and minority level of census tract (substantially minority or substantially white census tracts). Lending patterns were then compared to the demographics of the metropolitan area to illustrate potential lending disparities.

In addition, NCRC compared the proportion of high-cost loans made to a particular borrower group to all loans (prime plus subprime loans) made to that same borrower group. A disparity ratio illustrates how often lenders made high-

36 Low-to-moderate income is defined as incomes under 80\% of the Area Median Income (AMI) as reported by the 2010 Census.
cost loans to one borrower group (e.g. Whites) compared to another group (e.g. African-Americans).

Market-rate loans are loans made at prevailing interest rates to borrowers with good credit histories. High-cost loans, in contrast, are loans with rates higher than prevailing rates made to borrowers with credit imperfections. The higher rates compensate lenders for the added risks of lending to borrowers with credit blemishes. While responsible highcost lending serves legitimate credit needs, public policy concerns arise when certain groups in the population receive a disproportionate amount of high-cost loans. When highcost lending crowds out market-rate options in traditionally underserved communities, price discrimination and other predatory practices become more likely, as residents face fewer product choices. While high cost lending has declined greatly since 2008 as a portion of the market it is still important to monitor and measure for disparate impact on protected classes.

## Share Analysis of All Single Family Lending in Arizona

Hispanic or Latino borrowers applied for far fewer loans than their population size would suggest. While $21 \%$ of all households in Arizona consisted of Hispanics, this borrower group received just $12 \%$ of all applications and $11 \%$ of loans
during 2013 and at 11.4\% the number of sub-prime loans made to Latinos was nearly four times as high as the percentage of sub-prime loans made to whites.

The Hispanic population of Arizona has a media age of just 25.4 years, while the non-Hispanic median age is 41.4 years old. This may explain the starkly different observations in our HMDA analysis for Hispanic households, as far fewer of them will be at a point where they are ready for ownership. ${ }^{37}$

African-American and Asian borrowers comprised just 4\% and 2\% of Arizona households, yet their numbers are sufficient to draw some information from. For example, the loans made to black households fall far below the size of their population suggests at just . 51 times as often non-Hispanic whites. Asian householders are more likely to secure a mortgage loans than non-Hispanic whites. This trend is not unique to Arizona, but should be monitored for disparate impact nonetheless.

This analysis indicates that residents of high minority tracts are more likely to be denied or receive a sub-prime loan. This is consistent with other research on the topic, which found that tract level minority and income were highly correlated with the kind of lending, regardless of the attributes of the borrower in terms of race or income. ${ }^{38}$

## Denial Disparity Analysis of All Single Family Home Lending in Arizona

Hispanic borrowers were 1.34 times as likely to be denied single-family loans, as were White borrowers. Furthermore, African-Americans were 1.39 times more likely to be denied a single-family loan than White applicants. About 18\% of all Hispanic and African-American loan applications were denied in Arizona, while just 12\% of non-Hispanic White applicants saw their applications declined (see Table 1c and Chart 1c located in Appendix G and H).

LMI applicants were slightly more likely to be denied a single family loan than MUI borrowers (Table 2c and Chart 2c). This again reinforces the idea that borrower characteristics are of minimal importance. More study is indicated in this area.

## Summary and Conclusions

- Arizona has peculiar demographic transition factors that are dramatically impacting the HMDA analysis for 2013. In particular, the vast Hispanic population is an iceberg in terms of housing demand, with perhaps a majority of its members too young to be traditional homeowners. In a very few years these young Hispanics will be a source of significant demand for new housing and mortgage credit.
- Arizona does display some evidence that mortgage lending is less common in tracts with higher levels of minority population, although the income or race of the borrower seems to be of some importance. This also reflects other research on this topic, in that neighborhood characteristics

37 Annual Estimates of the Resident Population by Sex, Age, Race, and Hispanic Origin for the United States and States: April 1, 2010 to July 1, 2013 Source: U.S. Census Bureau, Population Division Release Date: June 2011
are often more important than borrower characteristics in pricing and denial rates. This evidence suggests future areas of research in Arizona and is not in and of itself, explanatory.

- We attempted a histogram analysis of lenders in Arizona to determine if any were statistical outliers in terms of ignoring or focusing on underserved communities. We found little evidence of a normal distribution of lenders in terms of either lending in LMI tracts or lending in minority tracts. This reduces the effectiveness of this form of analysis so it is not included in this report. It is possible that this form of analysis is only effective at the MSA level, if so it would indicate a need to perform such an analysis at the other MSAs in Arizona.

## Fair Housing Education and Outreach

## Southwest Fair Housing Council

The Southwest Fair Housing Council conducts extensive education and outreach activities throughout Arizona, funded through HUD Fair Housing and Equal Opportunity grants and the Arizona Department of Housing. From 2010-2014, SWFHC conducted 853 presentations or workshops and participated in 260 community events, reaching a total of 58,090 people. SWFHC has also distributed 217,209 pieces of fair housing literature in the region. SWFHC trainings and presentations target housing professionals, agency staff, and the general public.

Education and outreach programs are vital to the elimination of housing discrimination. Often fair housing violations are the result of housing professionals being unaware of the nuances and protections of the FHA. For example, disability violations are currently among the most common fair housing complaints nationally and statewide. Housing providers often discriminate against persons with disabilities because they are unaware of their responsibilities in granting reasonable accommodations and modifications. Education and outreach programs also empower the public to be aware of when they may be victims of housing discrimination and know how to file a complaint or seek assistance. Housing discrimination today is often not as overt as it may have appeared in the past, making it important for housing seekers to understand their fair housing rights and how to seek assistance.

## Arizona Department of Housing

Below is information on activities that ADOH undertook during the five year period between Fiscal Year 2010 and Fiscal Year 2014 (July 1, 2009-June 30, 2014) to alleviate barriers to fair housing and disparate impacts on lowincome, financially troubled, disabled, or other vulnerable populations.

## Education and Outreach

ADOH has funded SWFHC to conduct extensive education and outreach, including fair housing training for the general public, certification trainings for housing professionals, the distribution of fair housing literature, and participation at public events. Education and outreach is an effective tool that jurisdictions can use to combat housing discrimination. ADOH also continues to host an annual statewide housing conference to promote affordable, fair housing choices throughout Arizona. During the day and a half event, approximately 400 attendees attend sessions on a myriad of topics ranging from best practices in development and design, to fair housing and addressing the housing needs of the homeless and special needs populations.

## Compliance Monitoring

Additionally, ADOH monitors their CDBG funding applicants and recipients to ensure compliance with FHA. Every year the Rental Department updates and distributes the Qualified Allocation Plan (QAP), which describes the requirements and gives instructions on how to submit an application for tax credits and HOME or State Housing Trust Funds to be used as gap financing. Developers and non-profits submit these applications to renovate, demolish and rebuild, or to build new multi-family housing for low income individuals and families. Each applicant must submit a HUD Affirmatively Furthering Fair Housing (AFFH) form along with the application which ADOH reviews for completeness. The applicant also submits selection criteria for prospective renters which are reviewed to make sure that it is not discriminatory in any way. For those that have not completed the AFFH form correctly, the Rental Department writes a letter documenting what needs to be corrected before their application is scored. After the Rental Department has awarded all of the tax credits allocated for that year, the contracts are transferred
to the Compliance Department, which monitors the developments to ensure compliance with all regulations and laws.

ADOH also reviews a survey distributed to its CDBG subgrantees annually. The survey asks various questions about the ways in which subgrantees are affirmatively furthering fair housing in their communities. In all surveys submitted to SWFHC, every community indicated that they have an AFFH file created, have a fair housing poster displayed at all times, and issues a fair housing proclamation or resolution. None of the communities had issued any fair housing complaints to HUD or the AZAG though all had access to proper referral numbers. During an annual monitoring visit of nearly 3,000 properties, ADOH confirms that a fair housing poster is visible.

# 2015 Fair Housing Impediments 

Many of the impediments identified in this AI were also identified in the 2010 AI. This is common considering the difficulty of eradicating illegal housing discrimination. It also does not mean that progress has not been made. In fact, it is quite the contrary. Progress has been made to address and stamp out housing discrimination in Arizona. Despite this progress, research done for this report shows that illegal housing discrimination does occur in Arizona and requires continued action.

## Impediment 1:

## Illegal housing discrimination continues to occur in Arizona outside of Community Development Block Grant (CDBG) entitlement jurisdictions including Maricopa County, Pima County, Yuma, Prescott, Sierra Vista, Flagstaff, and Douglas.

SWFHC and the Arizona Attorney General (AZAG) process numerous fair housing complaints from the area covered by this report. SWFHC also conducts fair housing testing throughout the state. These activities indicate that illegal housing discrimination is occurring in many facets of the housing market. SWFHC's education and outreach program also interacts regularly with housing consumers and providers throughout the state and receives anecdotal evidence from community members, housing providers, real estate agents, government entities, and others that illegal housing discrimination occurs and the majority is not reported.

Information provided to SWFHC from the Arizona Attorney General (AZAG) regarding fair housing complaints processed in Arizona, as well as the results of SWFHC's extensive testing in the community, indicate that housing discrimination is an ongoing problem. The AZAG has processed 985 fair housing complaints since 2009. Though only $9 \%$ of these complaints resulted in a conciliation or settlement and only 7 resulted in legal action after a cause finding resolution, the sheer number
of complaints filed, combined with the assumption that only $1 \%$ of housing discrimination is ever reported, ${ }^{39}$ indicates more housing discrimination is occurring than is being confirmed through the complaint filing process. SWFHC tests have uncovered that people of color, persons with disabilities, and families with children face housing discrimination an average of $12 \%$ on the time when seeking housing.

Additionally, there is significant evidence of discrimination towards persons with disabilities in the area. For example, 583 of the complaints filed with the AZAG, or $66 \%$, were on the basis of disability. Eighty-eight of the 131 cause finding complaints reported in HUD's TEAPOT data since 2010 were for disability complaints as well. In the last 5 years, nearly $14 \%$ of all housing inquiries SWFHC has processed pertained to disability and $11.43 \%$ of disability tests confirmed that discrimination had occurred. The high number of complaints brought by persons with disabilities is consistent with national and statewide trends. When combined with the survey and interview feedback received, citing a need for more accessible housing, it becomes clear that continued education and outreach, particularly concerning disability issues, is necessary to combat ongoing discrimination.

## Impediment \#2:

## Housing consumers continue to be largely unaware of their rights under the Fair Housing Act and the resources available to help them understand and exercise those rights.

A fair housing survey targeting consumers, a phone survey of agencies about the accuracy of fair housing referrals, and interviews with housing professionals were conducted. The results of these activities and the experience of education and outreach providers throughout Arizona show that an unacceptably high number of Arizonans are unaware of their fair housing rights and available fair housing resources. Arizona is a very large state and the population in rural areas is difficult to reach. Limited funding sources for fair housing education and outreach limits the amount that can be done. When consumers do not understand their rights, illegal housing discrimination goes unreported and unpunished.

SWFHC has an established statewide education and outreach program funded in large part by the ADOH, as well as a comprehensive enforcement program, which serves the entire state. Since 2010, SWFHC processed 2,802 inquiries, most of which were housing consumers calling to determine if their housing question fell under fair housing. Although only $31 \%$ of those inquiries, or 870 , resulted in a fair housing related question, the volume of calls received indicates there is ongoing confusion throughout the state about fair housing rights and responsibilities. SWFHC regularly receives inquiries at fair housing education and outreach activities throughout the state. Additionally, SWFHC was told by housing professionals during the interview process that people do not understand their fair housing rights and $13 \%$ of survey respondents said they either would do nothing or would not know what to do if they witnessed housing discrimination.

## Impediment 3:

Housing providers and entities that assist people with housing related issues do not adequately understand rights and responsibilities under the Fair Housing Act. They also do not know how to identify fair housing violations or where to refer people whose fair housing rights may have been violated.

A review of fair housing complaints, trainings, events, a community survey, focus groups, and stakeholder interviews provide evidence that housing providers and other entities need continued fair housing training. SWFHC conducted 308 fair housing courses for housing professionals throughout Arizona since 2010. Housing professionals who attend these classes are often very unfamiliar with fair housing laws. SWFHC also participated in 260 events throughout the state during this time during which staff spoke to hundreds of people. Many of the people had never heard of the Fair Housing Act and the protections that it affords. The number of complaints filed and settled with the AZAG also indicates that housing providers do not understand fair housing law, particularly in the area of disability discrimination which comprised $66 \%$ of the complaints filed with the AZAG. Out of all fair housing inquiries processed by SWFHC, 13.74\% of them were national origin, the highest category. The next highest category was disability at nearly $8.92 \%$.

SWFHC also conducted tests of housing professionals and service providers throughout Arizona to determine if staff could identify the tester's mock housing discrimination question as a fair housing violation. Two types of tests were conducted, for national origin and familial status. The housing professionals were significantly more likely to be able to identify race discrimination than familial status. Only 29\% of the calls completed were referred to SWFHC or another appropriate fair housing agency to assist with the problem.

## Impediment \#4:

NIMBY (Not in My Backyard) attitudes are an impediment to fair housing choice.

NIMBYism that impedes fair housing is a difficult issue for jurisdictions to resolve. Residents regularly pack public hearings and other government meetings to express opposition to such things as affordable housing, group homes, transitional housing, or other special needs housing that often serve protected classes. Elected officials are swayed by opposition raised by organized vocal citizens. This can for example force affordable housing to be constructed in low opportunity minority concentration areas because of the lack of opposition. This has been successfully
challenged in court because it does not meet the obligation to affirmatively further fair housing (AFFH). Constructing affordable housing in integrated high opportunity areas, though often controversial because of NIMBYism, meets the AFFH obligation. NIMBYism is also be reinforced by attitudes towards illegal immigration. SB1070 and other laws and actions discussed earlier do not explicitly target Hispanics, but Hispanics and others do believe they are being targeted. NIMBY attitudes can be bolstered by the belief that affordable housing and other government services are being used by people in the country illegally. One response to NIMBYism is targeted education and outreach to market the advantages and obligations of fair housing to residents.

## Impediment 5:

## Lack of affordable housing throughout the state has a greater impact on classes protected by the Fair Housing Act.

Lack of affordable housing is an issue throughout Arizona and can have a direct impact on fair housing. According to American Fact Finder, 33.6\% percent of rural households and $48.3 \%$ of urban households are considered cost-burdened, meaning that $30 \%$ or more of household income is spent on housing related costs each month. The lack of affordable housing has a bigger impact on protected classes. Demographic, employment, and income data show that FHA protected classes including minorities, families with children (including single parent families), and persons with disabilities are more likely to be low-income and therefore have the greatest need for affordable housing. Furthermore, because of the connection between affordable housing and FHA protected classes, the term "affordable housing" to some has become a metaphor for housing for minorities, families with children, and persons with disabilities and is laden with inaccurate stereotypes. Thus, affordable housing construction and policies may be opposed by
"Not In My Backyard" (NIMBY) groups for prejudicial reasons that may obscure the real intent of critics.

The location of affordable housing can be a fair housing issue as well because the FHA requires that Community Development Block Grant (CDBG) entitlement jurisdictions affirmatively further fair housing (AFFH). Those requirements involve locating affordable housing throughout communities, not solely in areas of racial and ethnic concentrations of poverty. The location of these projects is important to fair housing because the accessibility of affordable housing to public transportation, employment, good schools and other opportunities is critically important to the financial, educational, and social well-being of protected classes.

Additionally, the economic benefits of affordable and diverse neighborhoods to communities is often not emphasized enough. The reduction of crime, gangs, drugs, and graffiti can not only has a positive impact on the safety and appearances of neighborhoods and reducing possible redlining and insurance costs, but also leads to reductions in the cost of law enforcement and city maintenance which is reflected in lower tax rates. The disparities that develop from segregated communities "ultimately hurt everyone by depressing residential property values and, hence, property tax revenues; raising the costs of delivering public services; reducing government spending on productive public goods; undermining the competitiveness of the nation's workforce; and sustaining racial stereotypes and social polarization. ${ }^{140}$ Additionally, segregated neighborhoods fuel flight and encourage sprawling residential development, raising commute times and traffic congestion. ${ }^{41}$ More work needs to be done to explain the relationship between affordable housing and neighborhood diversity to the cost of maintaining a healthy community and to get this message across to concerned residents.

40 The Urban Institute; http://www.urban.org/ UploadedPDF/411955promotingneighborhooddiversity.pdf, page 3

41 The Urban Institute; http://www.urban.org/

## Impediment 6:

Data gathering from CDBG subrecipients should continue to improve to meet evolving HUD requirements to affirmatively further fair housing.

Since its inception, the AI process has been continually evolving. As technology improves the ability of CDBG jurisdictions to plan for fair housing, collect information, organize information, monitor performance, evaluate the effectiveness of the implementation of plans and report on outcomes, results have improved. HUD has been expecting more from CDBG jurisdictions in the development of AIs and in the planning that is entailed. Recent legal and complaint action relating to AIs, as was seen in Westchester County, NY, only accelerates this trend. Westchester County faced large fines and loss of future funding for having taken millions of federal housing dollars and falsely claiming it had complied with fair housing laws. ${ }^{42}$

Though ADOH has improved the quality of information gathered from its CDBG recipients, more information is needed to effectively monitor recipients and their projects. The information collected from recipients involves education and outreach measures, staff trainings, and an organizational commitment to fair housing. Technical data regarding zoning and land use codes, community demographics, housing related statistics, and analyses of program effectiveness are not reflected in the surveys that ADOH collects from sub-recipients

## Impediment 7:

The post-foreclosure crisis housing market experienced tighter credit conditions for homebuyers and rising rents for renters. This limited homeownership opportunities

42 http://www.nytimes.com/2013/04/16/opinion/westchester-
loses-again-on-fair-housing.html

## and made rental housing less affordable for minority households.

The 2010 Arizona AI was written during a unique time for housing in Arizona and the nation. The housing bubble had burst and home values plummeted. The foreclosure crisis and Great Recession that followed hit Arizona harder than many parts of the country and created many challenges for the housing market. The 2010 AI contains an in-depth analysis of the impact of the foreclosure crisis in Arizona Currently, the state's housing market is recovering at a rate faster than many areas of the country, yet home seekers are facing new challenges. ${ }^{43}$

This AI focuses on a relatively small, rural population distributed throughout a large geographical area, likely limiting the amount of research and analysis that has been conducted specifically on Arizona counties excluding Maricopa and Pima Counties. Also, since foreclosure is only one of many topics covered in this report, a limited literature review was warranted. However, based on the overwhelming evidence that minority groups were hit much harder by the foreclosure crisis than non-Hispanic whites throughout the country, it is reasonable to hypothesize that minority households throughout the Arizona counties covered in this AI were impacted more severely than non-Hispanic white households as they were throughout the nation. As noted, the post-foreclosure housing market has experienced tighter credit conditions, rising rents, and rising home prices making housing affordability an issue. Because of the impact housing affordability has on protected classes under the Fair Housing Act, it is important that the state take this into consideration when reviewing its programs, policies, and practices through the lens of fair housing to meet its obligations to affirmatively further fair housing as it relates to funds received to through settlements noted in this report as well as future funding for housing and community development.

[^10]pdf

## Impediment 8:

## Arizona demographics vary greatly by region making it necessary to look at fair housing issues through a regional perspective. Differences in income, racial and ethnic concentrations, and age vary greatly across the state, making it difficult to create "one size fits all" policies and programs to affirmatively further fair housing in Arizona.

Arizona is a large state with varying geographic constraints, racial and ethnic patterns, and economic characteristics. The state's jurisdiction includes communities located hundreds of miles from significant urban areas with stagnant development, as well as rapidly changing communities with expansive development. There are communities with extremely high foreign-born populations and historically Hispanic communities located along the US/Mexico border in the desert south, and communities bordering some of the largest Native American reservations in the nation on the Colorado Plateau to the north.

All of these communities contain unique cultural dynamics and physical limitations which influence the types of housing and economic resources needed and available. Due to the dynamic and diverse communities located throughout the state, ADOH is unable to develop "one size fits all" fair housing policies and programs. Fair housing initiatives must be sensitive to regional and local context. Additionally, varying primary languages and cultural norms pose a challenge to effective fair housing education and outreach. It is necessary to continue to refine develop education and outreach strategies that will meet the needs of all Arizonans.

## Review of 2010 Impediments and Plan of Action

In the following section, all of the impediments found in the 2010 Analysis of Impediments to Fair Housing Choice for the State of Arizona are listed, along with measures that were taken to address the impediment. There were eight impediments identified in the 2010 Action Plan. Virtually all the action steps that were proposed in the 2006 plan were conducted and in some cases, the results indicate success in reducing particular barriers. However, in other cases, it is difficult to evaluate the extent of the impact or the results appear to be limited. As a result, a few of these impediments carry over to the 2015 Plan of Action. Others are very similar to those in 2010 but have been revised to better define the impediment and in a couple cases the issues were folded into the revised impediments and no longer stand alone.

## Results and Assessment

## Impediment \#1

## Illegal housing discrimination is occurring in non-metro counties in Arizona.

The allegations, complaints, testing, interviews, and surveys conducted for this AI provide evidence that housing discrimination is occurring in rural Arizona. However, it is difficult to determine its prevalence overall and in any specific area for the following reasons:

1. Housing consumers do not have a clear understanding of what constitutes housing discrimination or where to seek assistance.
2. Agency staff often lack proper training to recognize housing discrimination. In addition, procedures are frequently inadequate for referring possible housing discrimination victims.
3. Fair housing inquiries, allegations and complaints are often not logged and reported. The need to address housing discrimination in rural Arizona was first identified in the 1996 AI by the Arizona Department of Commerce, a precursor
to ADOH, when it stated that more testing was needed in rural areas in order to weed out the discrimination that was occurring. In the 2006 AI , the need for more enforcement in rural areas was carried over as a separate impediment. This need is folded into impediment \#1 for this AI.

## Action \#1

As noted in the discussion of the 2010 Plan of Action, ADOH does not enforce the Fair Housing Act. The state agency that handles fair housing enforcement is the State of Arizona Attorney General's Office - Civil Rights Division (AZAG). Nevertheless, ADOH will continue to address this impediment through the education and outreach it will be conducting in response to this and other impediments including:

1. Train CDBG recipients to recognize housing discrimination when allegations are made or clients encounter housing problems and then to refer them to agencies that can help them remedy the issue or file a complaint with HUD or the AZAG.
2. Distribute fair housing literature to housing consumers to provide them with the information they need to respond to housing discrimination.

## Analysis:

The Arizona Department of Housing has continually funded a successful statewide education and outreach program since the 2010 AI through the Southwest Fair Housing Council to train housing consumers and professionals, distribute literature, and attend events among other activities. Statistics for this program can be found on page 52 of this report.

## Impediment \#2

## Many housing consumers are unaware of their fair housing rights and available fair housing resources. Therefore, when housing discrimination is encountered, it often goes unreported and unresolved.

A community survey about fair housing and discrimination, a phone survey about the accuracy of fair housing referrals and interviews with housing industry professionals were conducted. The complete results and conclusions about these efforts can be found in this report in the section "Assessment of Current Public and Private Fair Housing Programs and Activities in Arizona." The survey results and the experience of education and outreach providers throughout Arizona show that an unacceptably high number of Arizonans are currently unaware of their fair housing rights and available fair housing resources. The physical size and population distribution of Arizona, as well as limited funding exacerbates this impediment by impeding the provision of fair housing education and outreach to many areas that need it most.

## Action \#2

The State of Arizona will continue to fund education and outreach (E\&O) throughout non-metro Arizona as it has since 1994. ADOH presently contracts with a fair
housing E\&O provider to conduct E\&O throughout the non-entitlement areas of the state. The activities that were conducted since 2005 are described in the "Education and Outreach" section of this AI. Arizona, like other states, is facing an extreme budget deficit that makes it challenging to maintain the level of non-federal funding that was previously provided for E\&O. ADOH will conduct the following activities with the same levels of frequency it has since 2006:

1. Conduct fair housing workshops targeting housing consumers in each of the four Councils of Government (COGs) in the state. The objective of the location and marketing of these workshops will be to provide residents in all of the thirteen rural counties in Arizona an opportunity to participate in the training.
2. Provide a presence (e.g. staff a table) and distribute fair housing materials at community events that serve the thirteen rural counties in Arizona. Identify and establish sites in each rural county where fair housing literature will be distributed on an on-going basis, and ensure the materials are maintained and the sites are kept stocked. Fair housing materials will also be distributed at meetings, trainings, forums and community events in each of these counties when the opportunity presents itself. These materials will be available in both English and Spanish.
3. Participate in local radio talks shows to discuss, educate and respond to questions regarding fair housing. The objective will be to conduct these broadcast sessions in each area of the state in order that residents in all thirteen rural counties will have an opportunity to hear them. Collaborate with public and private agencies, organizations and groups statewide to plan and conduct these activities.
4. ADOH will support and participate in activities conducted and sponsored by the Arizona Fair Housing Partnership (AFHP). ADOH will annually request a
proclamation from the Governor declaring April as "Fair Housing Month." This proclamation is helpful in building an awareness of fair housing throughout the state and kicks off the fair housing activities that are conducted throughout the state in April. These activities will be logged, summarized and reported annually in the CAPER.

## Analysis:

The Arizona Department of Housing has continually funded a successful statewide education and outreach program through the Southwest Fair Housing Council to train housing consumers and professionals, distribute literature, and attend events among other activities. Statistics for this program can be found on page 52 of this report. Arizona has taken all of the actions noted with the exception of requesting a fair housing proclamation.

## Impediment \#3

## Many housing providers illegally discriminate because of inadequate knowledge and understanding of their responsibilities under the Fair Housing Act (FHAct).

This AI investigation which included interviews, surveys, the results of systemic testing and the observations of fair housing providers conducting E\&O over the last several years showed that many real estate agents, property managers, property owners, media advertising agents, home insurance agents, lenders and other providers need to better understand their responsibility to comply with fair housing laws. The following problems are evident:

- Many providers do not obtain the free fair housing training and information that is available. Some property managers experience high staff turnover and do not provide training as often as needed.
- Some small property owners mistakenly believe that they do not need to comply with the Fair Housing Act.
- There are many gray areas between such issues as security, safety, and liability on the one hand and housing rights on the other. Many providers need up-to-date information in these areas in order to make better decisions.
- Housing providers in rural areas often need to drive long distances at considerable expense to receive necessary fair housing training.

## Action \#3

1. ADOH will continue to conduct fair housing training to housing providers throughout the non-metro rural areas of the state (See the "Fair Housing Education and Outreach" section of this report for trainings conducted since 2005). To overcome the barrier of time and distance for providers these trainings will take place in the rural areas themselves.
2. ADOH will continue to offer continuing education units (CEU) to real estate agents in non-metro areas throughout the state. CEUs provide an effective incentive for agents to participate in quality fair housing trainings.
3. ADOH will continue to fund the development and distribution of fair housing instructional materials to housing providers. Presently, ADOH's contracts with SWFHC for the distribution of 12,000 pieces of literature annually to both housing providers and consumers.

## Analysis:

The Arizona Department of Housing has continually funded a successful statewide education and outreach program through the Southwest Fair Housing Council to train housing consumers and professionals, distribute literature, and attend events among other activities. Statistics for this program can be found on page 50 of this report. Arizona offers CEU credits through the Southwest Fair Housing Council.

## Impediment \#4

Many public and private agencies in non-metro Arizona lack effective fair housing referral procedures. This impedes people's access to agencies that provide fair housing information and assistance to victims of housing discrimination.

SWFHC conducted a telephone survey in 2007 and in 2009 to determine how accurately government agencies and nonprofits throughout rural Arizona refer callers with fair housing questions or complaints. The survey results are in this report in the section "Assessment of Current Public and Private Fair Housing Programs and Activities in Arizona." Both surveys revealed that a significant number of calls were not properly referred. Many public and private agencies that were surveyed do not have clear and consistent procedures for referring people with fair housing problems. This creates an impediment to fair housing because many people in rural areas who contact a local government agency or a well-known local nonprofit agency for fair housing assistance do not get the information they need to proceed with their issue or receive misinformation that also impedes them from getting the proper help. In addition, inquiries, allegations and complaints are often not logged and the true prevalence of housing discrimination is obscured.

1. ADOH will monitor the referral procedures of all CDBG recipients through an annual questionnaire that will require identification of the procedure used to train staff, log contacts, and specify the agencies to which they refer fair housing issues. Agencies that do not have effective referral procedures in place will be referred for training.
2. ADOH will continue to fund fair housing referral training at no cost to public and private agencies. ADOH will also provide all CDBG participants ongoing technical assistance on fair housing.
3. ADOH will provide all CDBG funded agencies with printed materials describing the recommended referral procedures and a list of agencies to which fair housing concerns, allegations, and complaints can be referred. These will also be made available to agencies not funded by the state.

## Analysis:

The Arizona Department of Housing has continually funded a successful statewide education and outreach program through the Southwest Fair Housing Council to train housing consumers and professionals, distribute literature, and attend events among other activities. Statistics for this program can be found on page 50 of this report. The AFFH surveys of CDBG recipients which were provided to SWFHC indicate that there are referral procedures in place, however none of the recipients in the surveys provided had referred any fair housing inquiries. It also is not clear what technical assistance ADOH has provided to CDBG participants.

## Impediment \#5

## Disparities in lending and predatory lending practices are impediments to fair housing choice in Arizona.

Data presented in this AI, which included an analysis of HMDA reports and information on the current foreclosure crisis in the state evidenced the following:

- Subprime lending targeted minorities prior to the collapse of the housing market in 2007.
- Subprime borrowers have been hardest hit by the impact of the market collapse. This includes a precipitous drop in housing prices and a depressed economy with increased unemployment in the face of interest rate increases on adjustable rate mortgages. The result has been unprecedented levels of defaults and foreclosures. Minority neighborhoods are experiencing a higher proportion of foreclosures and abandonments compared to white neighborhoods. This is resulting in redlining from lenders unwilling to loan in neighborhoods with high rates of foreclosures and insurance companies unwilling to write policies or offering dramatically increased rates.
- Foreclosure rescue and mortgage modification scammers are targeting minorities and people with limited English proficiency (LEP).

Minorities with similar or better qualifications than nonminorities continue to experience higher rates of loan denials and higher rates of subprime loans from lenders.

## Action plan from previous AI

1. ADOH will collaborate with organizations such as the Arizona Foreclosure Prevention Task Force and Don't Borrow Trouble in Pima County by co-sponsoring trainings for people at risk of foreclosure, promoting counseling efforts to people wanting a loan modification and encouraging enforcement efforts of state and federal agencies to charge and punish agents and companies who perpetrate illegal foreclosure and loan modification scams.
2. ADOH will require that information on predatory and abusive lending practices be included in the education and outreach materials that are distributed on an ongoing basis throughout the state.
3. An annual anti-predatory lending training will be presented in the four state COG areas. This will be
marketed to public and private agency staff, housing consumers, and housing providers.

## Analysis:

The Arizona Department of Housing has continually funded a successful statewide education and outreach program through the Southwest Fair Housing Council to train housing consumers and professionals, distribute literature, and attend events among other activities. Statistics for this program can be found on page 50 of this report. Arizona and ADOH has promoted housing counseling efforts throughout the state by working with various providers. Predatory lending materials are widely distributed. Predatory lending information is also provided in many of the fair housing trainings offered by ADOH through the Southwest Fair Housing Council and has been provided in the state's Council of Government areas.

## Impediment \#6

## "Not in my Backyard" (NIMBYism) can be an impediment to fair housing because it has obstructed plans and policies to provide affordable housing and special needs housing that serves protected classes.

NIMBYism that impedes fair housing is a difficult issue to resolve. It is not unusual for residents to coordinate attendance at public hearings and council meetings to express opposition to such things as affordable housing, group homes or transitional housing, and elected officials are often intimidated by the possible political consequences of opposing vocal citizens when they organize. Freedom of speech is rightly valued in our country and as long as speech and actions do not threaten bodily harm, violence or cross the line into becoming illegal slander, defamation or disturbance of the peace it cannot be restricted or prohibited. The only viable response is targeted education and outreach to market the advantages of fair housing to residents.

## Action plan from previous AI

ADOH will continue to conduct the following activities to address this impediment:

1. Implement the comprehensive strategy to provide fair housing education and outreach statewide.
2. Provide public hearings throughout the state to provide residents an opportunity to learn about the benefits of affordable housing and diversity in neighborhoods and express their concerns regarding affordable housing projects. These materials are available through both the Arizona Foreclosure Task Force and Don't Borrow Trouble of Pima County. For example, the economic benefits of affordable and diverse neighborhoods to communities is often not emphasized enough. The reduction of crime, gangs, drugs, and graffiti can not only has a positive impact on the safety and appearances of neighborhoods and reducing possible redlining and insurance costs, but also leads to reductions in the cost of law enforcement and city maintenance which is reflected in lower tax rates. More work needs to be done to explain the relationship between affordable housing and neighborhood diversity to the cost of maintaining a healthy community and to get this message across to concerned residents.

## Analysis:

Effectively addressing NIMBYism is a complex and difficult proposition. Though the state has effectively implemented a comprehensive strategy to provide fair housing education and outreach statewide, it has not addressed NIMBYism directly through public hearings. This is an ongoing impediment and should be addressed in the 2015 Plan of Action with new and creative solutions.

## Impediment \#7

## The issue of affordable housing is a fair housing impediment in two ways:

## - The lack of affordable housing throughout the state has a disparate negative impact on Fair Housing Act protected classes.

- Planning to affirmatively further fair housing will be included/expanded in affordable housing projects funded by ADOH.

Affordable housing is an issue that has a broad impact in every area of the state and can have a direct impact on fair housing. The factors affecting the need for affordable housing and its relationship to fair housing can be complex and entail historical, social, cultural, political, economic and geographical considerations. The relationship between affordable and fair housing in Arizona is evidenced, in part, by the following:

- The availability of affordable housing has a disparate impact on persons protected under the Fair Housing Act. Demographic, employment, and income data show that minorities, families with children (including single parent families), and persons with disabilities are proportionally over represented in low-income data and are most in need of affordable housing.
- Because of the connection between affordable housing and the protected classes covered by the Fair Housing Act, the term "affordable" to some has become a metaphor for housing for minorities, families with children and persons with disabilities and is laden with inaccurate stereotypes. Affordable housing construction and policies may be opposed by "Not In My Backyard" (NIMBY) groups for a myriad of specious reasons that may obscure the real intent of critics.
- The location of affordable housing is a fair housing issue. The accessibility of affordable housing to public transportation, employment, good schools and other amenities is critically important to the financial, educational and social well-being of protected classes.

The disparate and less favorable provision of public services to affordable neighborhoods may create safety concerns, lower property values, induce redlining, and facilitate the deterioration of the neighborhood.

## Action \#7

ADOH directly creates affordable housing through a number of programs that are part of the Consolidated Plan. This AI is a component of the Consolidated Plan. Beyond the development of affordable housing itself, each ADOH affordable housing project should affirmatively further fair housing in the following ways:

1. Each ADOH Request for Proposals (RFP) for housing-related projects and funding should include a section where AFFH is addressed by the applicant and scored by ADOH.
2. Each housing project funded by ADOH includes a clear AFFH plan as a component of the operational plan. The AFFH plan will include the following:

- Demographic data and maps to identify minority residential concentrations in the residential areas impacted by the project.
- Specific activities that will be conducted to AFFH (e.g. Affirmative Marketing Plan).
- All tax credit, HOME and Housing Trust Fund projects will be monitored to evaluate the performance of the project's fair housing goals.

## Analysis:

CDBG surveys indicate that all sub-recipients have an AFFH folder that show three fair housing activities occurring each year. These activities include literature distribution, PSAs, trainings, and other forms of fair housing outreach. Each recipient also has a fair housing proclamation or resolution and referral procedures in place. It is not clear if the recipients have an AFFH plan developed or what is included in the plan. ADOH has also developed down payment and mortgage assistance programs, operated a foreclosure prevention hotline during the height of the housing crisis, offers emergency rental assistance programs, and administered a foreclosure assistance grant. Additionally, ADOH purchased 687 foreclosed homes, increasing the number of affordable units and contributing to neighborhood stabilization.

## Impediment \#8

## On-going data gathering from CDBG subrecipients will need to improve to meet evolving AI requirements. The 2006 AI stated, "Information gathering and monitoring fair housing performance needs to be improved." ADOH responded with improvements in these areas. This impediment carries over to the $\mathbf{2 0 1 0}$ Plan of Action.

Since its inception, the AI process has been continually evolving. As technology improves the ability of CDBG jurisdictions to plan for fair housing, collect information, organize information, monitor performance, evaluate the effectiveness of the implementation of plans and report on outcomes, results have improved. HUD has been expecting more from CDBG jurisdictions in the development of AIs and in the planning that is entailed. This will continue. Recent legal and complaint action relating to AIs only accelerates this trend.

## Action \#8

While ADOH has complied with the standard information and reporting requirements for AIs to date, ADOH will need to do more in the future to stay ahead of the curve. ADOH will require a mandatory comprehensive questionnaire with new questions about local zoning and land use laws' compliance with fair housing laws be filled out and submitted by all sub recipients. The results of this questionnaire will be summarized and included in the annual CAPER and future AIs beginning in 2011. This questionnaire will include responses to questions regarding the following:

1. The exclusionary nature of zoning and land use codes; policies regarding group homes; changes and decisions regarding zoning made by local boards, councils or commissions; and legal cases or challenges to codes or policies in the last year. The appendix includes a detailed zoning and land use questionnaire provided by HUD that focuses on the effect of zoning and land use laws on people with disabilities, a protected class. The survey can
be modified to help acquire the necessary data to determine how zoning and land use laws affect any or all protected classes and whether or not the laws comply with fair housing laws.
2. Patterns of home ownership versus rental, housing density, housing age and/or condition, overcrowding, income, family size, residency tenure, bank loans by type, etc.
3. Demographic overview in terms of race, ethnicity, home ownership, income, poverty, etc. and trends.
4. The nature and extent of fair housing inquiries, allegations, complaints, referrals and outcomes documented by logs.
5. List and describe fair housing activities conducted within the jurisdiction of the sub recipient.

## Analysis:

ADOH created a survey that it requires subrecipients to complete. The survey information provided to SWFHC does not include questions regarding zoning and land use codes, demographic information, homeownership and rental statistics, or descriptions of fair housing inquiries. The survey included information regarding recipient's AFFH folder with three documented fair housing activities occurring each year. These activities include literature distribution, PSAs, trainings, and other forms of fair housing outreach. Each recipient also has a fair housing proclamation or resolution and referral procedures in place. It is not clear if the recipients have an AFFH plan developed or what is included in the plan. SWFHC, on behalf of ADOH, documents and compiles information about fair housing inquiries, allegations, complaints, referrals, and outcomes. It also describes fair housing activities conducted in sub recipient jurisdictions. This information is contained in this AI.

## 2015 Plan of Action

Several impediments identified in 2010 carry over because they continue to pose barriers to fair housing. Their persistence is indicative of the fact that in some cases, they have become embedded in the social, cultural, political and institutional fabric and their eradication will continue to require a long-term commitment.

## Impediment 1:

Illegal housing discrimination continues to occur in Arizona outside of Community Development Block Grant (CDBG) entitlement jurisdictions including Maricopa County, Pima County, Yuma, Prescott, Sierra Vista, Flagstaff, and Douglas.

## Action Steps:

As noted in the discussion of the 2010 Plan of Action, ADOH has no authority in the area of fair housing enforcement. The state agency that handles fair housing enforcement is the State of Arizona Attorney General's Office - Civil Rights Division (AG). Nevertheless, ADOH will continue to address this impediment through statewide fair housing education and outreach that includes:

1. Continue to train CDBG subrecipients to recognize housing discrimination when allegations are made or clients encounter housing problems and then to refer them to agencies that can help them remedy the issue or file a complaint with HUD or the AG.
2. Distribute fair housing literature to housing consumers to provide them with the information they need to exercise their fair housing rights.
3. Continue to update fair housing education and outreach programs to be responsive to changes in fair housing law, changing cultural contexts of communities, limited English proficiency populations, and other demographic changes.

## Impediment 2:

Housing consumers continue to be largely unaware of their rights under the Fair Housing Act and the resources available to help them understand and exercise those rights.

## Action Steps:

The State of Arizona will continue to fund education and outreach (E\&O) throughout its Community Development Block Grant (CDBG) jurisdiction as it has since 1994. ADOH presently contracts with a fair housing E\&O provider to conduct E\&O throughout the non-entitlement areas of the state. ADOH will conduct the following activities with the same levels of frequency it has since 2006:

- Conduct fair housing workshops targeting housing consumers in all non-entitlement jurisdiction counties. The objective of the location and marketing of these workshops will be to provide residents in all of the thirteen rural counties in Arizona an opportunity to receive fair housing training.
- Provide a presence (e.g. staff a table) and distribute fair housing materials at community events that serve the thirteen rural counties in Arizona.
- Identify and establish sites in each rural county where fair housing literature will be distributed on an on-going basis, and ensure the materials are maintained and the sites are kept stocked. Fair housing materials will also be distributed at meetings, trainings, forums, and community events in each of these counties when the opportunity presents itself. These materials will be available in English and Spanish and other languages as needed.
- Participate in media events to discuss, educate, and respond to questions regarding fair housing. The objective will be to conduct these sessions in each area of the state in order that residents in all thirteen rural counties will have an opportunity to hear them.
- Collaborate with public and private agencies, organizations, and groups statewide to plan and conduct these activities.
- ADOH will support and participate in activities conducted and sponsored by the Arizona Fair Housing Partnership (AFHP).
- ADOH will annually request a proclamation from the Governor declaring April as "Fair Housing Month." This proclamation is helpful in building an awareness of fair housing throughout the state and kicks off the fair housing activities that are conducted throughout the state in April.
- These activities will be logged, summarized, and reported annually in the CAPER.

## Impediment 3:

Housing providers and entities that assist people with housing related issues do not adequately understand rights and responsibilities under the Fair Housing Act. They also do not know how to identify fair housing violations or where to refer people whose fair housing rights may have been violated.

## Action Steps:

The State of Arizona will continue to fund education and outreach (E\&O) throughout non-metro Arizona for housing professionals and agency staff. ADOH will continue to ensure CDBG subrecipients are trained in effective fair housing referral procedures and encourage them to report any concerns.

1. ADOH will monitor the referral procedures of all CDBG recipients through an annual questionnaire that will require identification of the procedure used to train staff, log contacts, and specify the agencies to which they refer fair housing issues. Agencies that do not have effective referral procedures in place will be referred for training.
2. ADOH will continue to fund fair housing trainings that include proper referral procedures at no cost to public and private agencies. ADOH will also provide all CDBG subrecipients ongoing fair housing technical assistance.
3. ADOH will provide all CDBG subrecipients with printed materials describing the recommended referral procedures and a list of agencies to which fair housing concerns, allegations, and complaints can be referred. These will also be made available to agencies not funded by the state.

## Impediment 4:

## NIMBY (Not in My Backyard) attitudes are an impediment to fair housing choice.

## Action Steps:

ADOH will continue to conduct the following activities to address this impediment:

1. Continue to implement a comprehensive strategy to provide fair housing education and outreach statewide.
2. Provide trainings and other resources to communities throughout the state as the need arises so that residents have the opportunity to learn about the benefits of affordable housing, diverse neighborhoods, and the state's fair housing obligations.
3. Monitor current events throughout the state and proactively respond to situations which may impact members of the protected classes.

## Impediment 5:

## Lack of affordable housing throughout the state has a greater impact on classes protected by the Fair Housing Act.

## Action 5:

The Arizona Department of Housing (ADOH) and other state agencies that directly impact affordable housing through policies and programs will satisfy fair housing obligations and affirmatively further fair housing through affordable housing projects in the following ways:

1. ADOH request for proposals (RFP) for housing and community development related projects and funding will require that proposals address how they will affirmatively further fair housing (AFFH) based on its impact to racial and ethnic concentrations of poverty and protected classes.
2. Housing and community development projects funded by ADOH will include an AFFH plan that includes the following:

- Demographic data and maps to identify racial and ethnic concentrations or poverty in the residential areas impacted by the project.
- Specific activities that will be conducted to AFFH (e.g. Affirmative Marketing Plan).
- All tax credit, HOME, and Housing Trust Fund projects will be monitored to evaluate the performance of the projects fair housing goals.

## Impediment 6:

On-going data gathering from CDBG subrecipients will need to improve to meet evolving AI requirements. The 2006 AI stated, "Information gathering and monitoring fair housing performance needs to be improved." ADOH responded with improvements in these areas, however this impediment carries over to the 2015 Plan of Action.

## Action Steps:

While ADOH has complied with the standard information and reporting requirements for AIs to date, ADOH will need to do more in the future to stay ahead of the curve. ADOH will require a mandatory comprehensive questionnaire with new questions about local zoning and land use laws' compliance with fair housing laws be filled out and submitted by all CDBG subrecipients. The results of this questionnaire will be summarized and included in the annual CAPER and future AIs. This questionnaire will include responses to questions regarding the following:

1. The exclusionary nature of zoning and land use codes; policies regarding group homes; changes and decisions regarding zoning made by local boards, councils or commissions; and legal cases or challenges to codes or policies in the last year. The survey can be modified to help acquire the necessary data to determine how zoning and land use laws affect any or all protected classes and whether or not the laws comply with fair housing laws.
2. Patterns of home ownership versus rental, housing density, housing age and/or condition, overcrowding, income, family size, residency tenure, bank loans by type, etc.
3. Demographic overview that includes things like race, ethnicity, homeownership, income, poverty, persons with disabilities, families with children, etc. The overview should also identify racial and ethnic concentrations of poverty.
4. The nature and extent of fair housing inquiries, allegations, complaints, referrals, and outcomes based on proper documentation.
5. List and describe fair housing activities conducted within the jurisdiction of the subrecipient.

## Impediment 7:

The post-foreclosure crisis housing market experienced tighter credit conditions for homebuyers and rising rents for renters. This limited homeownership opportunities and made rental housing less affordable for minority households.

## Action Steps:

The state will assess how the housing crisis and its aftermath has had an impact on communities within the states jurisdiction and respond with appropriate projects, programs, and education and outreach. Though there is extensive evidence that the housing crisis disproportionately impacted minorities nationally and in large metropolitan areas, like Phoenix, more research and analysis should be done on the impact in smaller communities and rural areas statewide.

1. Assess how the housing crisis impacted protected classes in the state's jurisdiction by analyzing housing costs, homeownership and rental rate changes, foreclosure rates, and population changes in relation to the protected classes.
2. Create and support first-time homebuyer and other homeownership programs and projects that assist those impacted by the foreclosure crisis including protected classes.
3. Create and support affordable housing programs that improve affordability of homes for purchase and rental housing especially for protected classes.
4. Utilize the data provided in the CDBG recipient survey to continue monitoring housing patterns and demographic changes over time.
5. Select CDBG recipients whose programs will affirmatively further fair housing and mitigate the effects which the housing crisis had on protected classes.
6. Conduct fair housing education and outreach that addresses issues uncovered through research and CDBG subrecipient surveys.

## Impediment 8:

Arizona demographics vary greatly by region making it necessary to look at fair housing issues through a regional perspective. Differences in income, racial and ethnic concentrations of poverty, and age vary greatly across the state, making it difficult to create "one size fits all" policies and programs to AFFH in Arizona.

## Action Steps:

Develop regional strategies to affirmatively further fair housing in Arizona.

- Continue to utilize the Council of Government (COG) structure to monitor CDBG recipients and develop education and outreach strategies.
- Create regional fair housing priorities, goals, and selection criteria for potential CDBG recipients.
- Utilize information provided in the CDBG recipient surveys to monitor and update regional fair housing priorities and goals.

 not included in the state AI study.Source: 2010 US Census; Protected Areas Database of the US; Esri

* Concentration defined as greater than or equal to $10 \%$ above the state average
by Geoff Davies

## State of Arizona - Fair Housing Survey

Illegal housing discrimination occurs when one or more of the following occurs based on a person's race, national origin, color, religion, sex, or if they have children or a disability:

Refusing, discouraging or charging more to rent an apartment or buy a home.

Refusing or making it hard to get a loan to buy or refinance a house or take out home equity by doing things like charging more money or offering a worse deal than someone should be able to get if he or she shopped around.

| Refusing, <br> discouraging | Discrimination based <br> on disability: Refusing <br> or charging <br> more for <br> home |
| :--- | :--- |
| insurance. | accommodation, <br> refusing to allow a <br> modification to make <br> an apartment more <br> accessible for persons <br> with a disability or lack <br> of accessible units. |
|  |  |

F. Predatory lending: unfair, misleading, deceptive or fraudulent loan practices.

1. Have you or someone you know ever encountered one or more forms of housing discrimination described in the shaded boxes in your local area?

- Yes, I have or I know someone who has.
- I think I may have or I may know someone who has.No, I have not and don't know anyone who has.Don't knowOther $\qquad$

2. If you believe that you or someone you know encountered housing discrimination in your local area, please write down the letter(s) from the shaded boxes at the beginning of the survey that best describes the type of discrimination.

## Notes

"Total" refers to total of all races, which includes races in addition to the four included in this analysis. Therefore, the "Total" may not necessarily equal the sum of "White," "Black or African American," "Hispanic or Latino," and "Asian." This note holds true for both the lending analysis and the number of households.

Chart 1b Subprime Market Share of Loans by Race

Disparity Ratio is subprime market share of loans to a racial group divided by subprime market share of loans to whites.

Chart 1c Denial Rates and Disparity Ratios by Race

Disparity Ratio is denial rate for loans to a racial group divided by denial rate for loans to whites

Table 2. All Single Family Lending to Low-and Moderate-Income (LMI) Borrowers, Arizona By Race of Borrower
